

Subject card

Subject name and code	Fundamentals of International Freight Forwarding - class, PG_00174057						
Field of study	Logistics and Mobility						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		English English		
Semester of study	5		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Dorota Książkiewicz				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		5.0		30.0	50
Subject objectives	The aim of the course is to familiarize students with the specifics of freight forwarding activities						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[LML3_K03] participates in the preparation of logistics and mobility projects, being able to reconcile legal, economic, ecological, political and social requirements	Participates in the preparation of projects related to international freight forwarding and transport, demonstrating the ability to reconcile legal, economic, environmental, political, and social requirements involved in organizing and executing international logistics operations.	[SK5] implementation of a problem task
	[LML3_U07] is able to participate in the analysis and evaluation of alternative solutions to problems of logistics or mobility and select methods and instruments to rationally resolve them	is able to participate in the analysis and evaluation of alternative solutions to problems related to international freight forwarding and transport, and to select appropriate methods and tools for their rational resolution, taking into account legal, economic, and operational conditions.	[SU5] implementation of a problem task
	[LML3_W03] has advanced knowledge of the relationship between business entities and public institutions operating in the national, international and intercultural sphere, understands the importance of logistics and mobility for their functioning	has advanced knowledge of the relationships between economic entities and public institutions involved in international freight forwarding and transport processes, in national, international, and intercultural contexts; understands the importance of logistics and mobility for the effective functioning of these relationships.	[SW5] implementation of a problem task
	[LML3_U05] uses normative systems (legal, professional, ethical) to solve a specific logistics or mobility task	is able to apply normative systems (legal, professional, ethical) to solve specific problems and tasks related to international logistics and freight forwarding.	[SU5] implementation of a problem task
	[LML3_W07] has knowledge of the basic economic and financial principles of operation and management of business entities and organizations that require logistics support or provide logistics services, as well as legal, organizational, moral and ethical norms and rules of operation of public institutions	Has knowledge of the fundamental economic and financial principles governing the operation and management of entities involved in international freight forwarding and transport, as well as the legal, organizational, ethical, and professional norms applicable to freight forwarding companies and institutions supporting international trade.	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task
	[LML3_U02] is able to use its theoretical knowledge and acquire data to analyze specific logistics and mobility processes and systems, and to analyze these processes and systems using methods developed in economics, finance, management science, logistics and mobility	Is able to apply theoretical knowledge and collect data to analyze specific freight forwarding processes and transport operations within the international supply chain, using methods developed in economics, finance, logistics, and management sciences.	[SU5] implementation of a problem task
Subject contents	1. Characteristics of International Freight Forwarding Operations 2. Legal and Regulatory Foundations in International Freight Forwarding, Incoterms Rules 3. Modes of Transport and Their Importance in Freight Forwarding Specific Features and Utilization Possibilities 4. Freight Forwarding and Customs Documentation 5. Organization and Planning of Freight Forwarding Processes: Route Optimization, Cargo Management, and Selection of Appropriate Transport Means 6. Risk and Insurance in International Freight Forwarding 7. Artificial Intelligence, Automation, and Environmental Impact Assessment in International Freight Forwarding 8. Development Trends in Freight Forwarding Services (E-commerce Handling, Automation) Students are able to receive additional support and substantive guidance during consultation hours with the course instructors.		
Prerequisites and co-requisites	Fundamental understanding of transport processes.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	in-class tasks	50.0%	100.0%
