Subject objectives	The main goal of the course is to familiarize students with social problems and their complexity and diversity. During the lectures, not only definitional issues will be discussed, but also selected social problems, in particular those related to violence, helplessness and various addictions. During the classes, both the causes of social problems and their effects will be highlighted, as well as professional possibilities of solving them.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[SOCL3_W04] The graduate knows and understands in an advanced way the types of informal and formal social bonds that arise in different types of groups, social networks and societies, and with the regularities governing their change.	[SOCL3_W04] By studying curriculum issues, the student learns and understands in an advanced way the types of informal and formalized social bonds that arise in various types of groups, social networks and societies, as well as the regularities governing their change, especially those social bonds that may have the most significant impact on the occurrence of specific social problems, such as alcoholism or poverty.	[SW4] test/exam - oral or written
	[SOCL3_U03] The graduate is able to analyse the causes and course of social processes and phenomena	[SOCL3_U03] Can analyse the causes and course of social processes and phenomena that lead to the occurrence of specific social problems.	[SU4] test/exam - oral or written
