

Subject card

Subject name and code	Environmental change reconstructions - tutorial, PG_00135490						
Field of study	Physical geography and geoinformation						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Laboratory of Geomorphological Reconstructions -> Department of Geomorphology and Quaternary Geology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Sambor Czerwiński				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		15.0		30.0	60
Subject objectives	1. Introduction to selected methods used in paleoenvironmental research. 2. Learning the preliminary palaeogeographic interpretation of the results of selected laboratory and field analyses.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GFGMU2_U05] integrate knowledge from the discipline of Earth and environmental sciences, explaining and interpreting the interrelationships between environmental processes and phenomena in order to solve research problems in physical geography and geoinformation	Is able to integrate knowledge in the field of Earth and environmental sciences, correctly explaining and interpreting the mutual relations between processes and phenomena accompanying environmental changes at different time scales.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[GFGMU2_U03] effectively use selected scientific literature in the field of physical geography and geoinformation, both in Polish and English	Can effectively use scientific literature on the issues of environmental changes in the past.	[SU2] presentation/project/paper/report [SU3] text preparation/written work
	[GFGMU2_K01] critical assessment of knowledge in the field of Earth and environmental sciences and geoinformation, its completion and verification through critical analysis of scientific literature	Is ready to critically evaluate his/her knowledge of environmental change, supplement and verify it through critical reading of the appropriate literature.	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report [SK3] text preparation/written work
	[GFGMU2_W01] the specificity of Earth sciences in the field of physical geography, its internal structure, research subject and main research directions, conceptual apparatus, as well as practical applications of scientific achievements	Knows and understands the subject of research, the main research directions and the conceptual apparatus of palaeogeography, as well as the practical applications of scientific research in the field of reconstruction of environmental changes.	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[GFGMU2_W08] the most important contemporary problems on a regional and global scale, their essence, genesis and possible consequences	Knows the most important anthropogenic factors that could have influenced the characteristics of the studied sediments.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[GFGMU2_U02] precisely and appropriately use terminology in the field of physical geography and geoinformation in oral statements and written works	Can properly apply terminology used in the reconstruction of various sedimentary environments in a written work.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written [SU5] implementation of a problem task
	[GFGMU2_W02] issues in the field of exact sciences enabling the understanding of complex processes and phenomena occurring in the Earth's natural environment, and in their interpretations consistently rely on empirical foundations, using qualitative and quantitative methods	Knows and understands the interdisciplinary approach in Earth and environmental sciences, as well as qualitative and quantitative methods used in environmental reconstructions.	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
Subject contents	1. Analysis of main components of a sediment. 2. Selected microscopic methods used in environmental reconstructions. 3. Palaeogeographic interpretation of laboratory and field analyses results.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written test	51.0%	30.0%
	research report	51.0%	40.0%
	oral presentation	51.0%	30.0%

Osady rzek i jezior. UAM, Poznań.
	Supplementary literature	Regional and palaeogeographic literature on the area from which the research material originates.
	eResources addresses	
Example issues/ example questions/ tasks being completed	What are multi-proxy reconstructions? How does core sampling affect the reliability of the interpretation of palaeoenvironmental reconstruction? List and characterize 3 hypotheses about the beginning of the Younger Dryas.	
Work placement	Not applicable
