

Subject card

Subject name and code	Regional field practice - Europe, PG_00119829						
Field of study	Geography						
Date of commencement of studies	October 2025		Academic year of realisation of subject			2027/2028	
Education level	Bachelor's studies		Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	3		Language of instruction			Polish	
Semester of study	6		ECTS credits			3.0	
Learning profile	academic		Assessment form			credit	
Conducting unit	Centrum Monitoringu i Ochrony Wód -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Włodzimierz Golus				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	36.0	0.0	0.0	0.0	36
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	36		14.0		25.0	75
Subject objectives	Recognition of geographic features of selected regions and identification of patterns in their transformations, integrating theoretical and empirical knowledge acquired during preceding subjects and regional field exercises. Understanding the functioning principles of the geographic environment as a system of interacting components. Verification and improvement of skills in field observation and inference based on these observations.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GEOGRL3-U08] use scientific language and express themselves and discuss topics concerning geographic issues in Polish and in a foreign language	Speaking in Polish and English using specialized geographical vocabulary, and discussing topics related to issues concerning a specific region of Europe.	[SU1] oral statement/conversation/discussion [SU8] observation of student's independent or team work
	[GEOGRL3-W04] to an advanced degree the social, economic and political differentiation of the world, as well as the social, economic and political characteristics of countries and regions, especially northern Poland and the Pomeranian Voivodeship, understands the socio-economic transformations taking place in the modern world	Understands and can indicate the diversity of a selected region of Europe, considering its socio-cultural and environmental context.	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
	[GEOGRL3-W06] interactions between the natural and anthropogenic environment at different spatial and temporal scales, in particular the processes and phenomena occurring in the area of the South Baltic Coastal and Lake District and the determinants of these interactions	Recognizes and understands the relationships between various components of the environment, including changes occurring over time and space, with particular emphasis on a selected region of Europe.	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
	[GEOGRL3-W07] on advanced level methods of acquiring data on the natural and anthropogenic environment, including operation of specialized equipment	Student is able to search and evaluate information about the natural and anthropogenic environment in Polish and foreign language about any region of Europe.	[SW2] presentation/project/paper/report
	[GEOGRL3-U05] find and select the necessary information from professional literature and other sources, including electronic sources	Skillful identification and selection of basic and detailed information about a chosen region of Europe, with particular emphasis on foreign sources of information in both the local language and English.	[SU2] presentation/project/paper/report [SU8] observation of student's independent or team work
	[GEOGRL3-W05] Has advanced knowledge of the environment Earth's geographic environment, understood as a unified system of interrelated and interacting each other's components; its diversity, functioning and dynamics of change, including the mutual interaction of environmental components in the area of South Baltic Coastal and Lake Districts	Acquiring detailed and advanced knowledge about the natural and anthropogenic environment, including socio-economic aspects and the interactions between these components, in a selected part of Europe.	[SW2] presentation/project/paper/report

Subject contents	A.1. Physical-geographical characteristics of the selected exercise/research area as a region. Landforms, climate, water bodies, soils, physical-geographical processes. A.2. Physical-geographical conditions influencing economic development. Resource extraction, coastline, climatic conditions, transportation network development factors. Natural conditions influencing agricultural development. Bioclimatic diversity. A.3. Nature conservation: national parks and landscape parks in the southern part of the selected area. A.4. Historical conditions of socio-economic development in the selected region. Demographic and migratory processes, settlement structure, development and layout of the transportation network. A.5. Agricultural and food economy in the selected region. Main industrial centers in the region, along with their characteristics. Development of the region's tertiary sector. A.6. Political conditions influencing economic and demographic processes in the region. Political position of the region, political potential of the region, inter-state relations within the region. Issues in foreign and domestic policies of the region's states. A.7. Tourist development of selected centers in the region. Natural and anthropogenic conditions influencing tourism development. Degradation of the natural environment: conflicts between tourism and the need for nature conservation. A.8. Cultural heritage of the selected region. Cross-border cooperation and Euroregions.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Discussion	51.0%	25.0%
	Presentation	51.0%	75.0%
Recommended reading	Basic literature	A. Required Literature for Course Completion: A.1. Used during classes Recommended studies in physical and socio-economic geography of the selected region. Field observation journal compiled during the field exercises. A.2. Studied independently by the student	
		Supplementary literature	Detailed bibliography individually recommended by course instructors (according to the theme of the current issue being studied).
