

Subject card

Subject name and code	The basics of drilling - exercise, PG_00091084						
Field of study	Geology						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Department of Geophysics -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Robert Sokołowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		10.0		30.0	55
Subject objectives	Understanding of drilling documentation and geological-technical design of a borehole. Knowledge of the main trends in the development of drilling techniques, aspects of environmental protection, prevention of accidents in the drilling process.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GEOLL3_U01] is able to apply basic measurement and analytical techniques in the field and in the laboratory, plans to conduct research and measurements	Can apply basic measurement and analytical techniques during drilling operations, plan research and measurements	[SU2] presentation/project/paper/report
	[GEOLL3_W06] knows statistical and IT tools as well as the principles of preparing engineering and geological documentation and cartographic materials	knows and identifies the statistical and IT tools and principles for compiling geological documentation for drilling purposes	[SW2] presentation/project/paper/report
	[GEOLL3_K01] is willing to plan and implement, individually or as a team, the next stages of the entrusted task, take responsibility for its results, effectively cooperate in the team by performing various roles in it	Can individually and in a group, plan and carry out successive stages of drilling work, take responsibility for its results and interact effectively in a team with different roles	[SK2] presentation/project/paper/report
	[GEOLL3_U04] is able to use specialized computer software and mathematical and statistical methods in the analysis of geological data	Be able to use specialised computer software and mathematical and statistical methods in the analysis of drilling data, including geophysical data	[SU2] presentation/project/paper/report
	[GEOLL3_W08] knows the basic principles of occupational health and safety, legal regulations conditioning geological and engineering activities	Knows the basic principles of occupational health and safety when supervising and directing drilling operations	[SW2] presentation/project/paper/report
	[GEOLL3_U10] is able to work individually and cooperate in laboratory and field groups performing various functions in them and performing various tasks	Able to work individually and collaboratively in a group to carry out geological drilling projects and develop their results by performing a variety of functions and tasks	[SU2] presentation/project/paper/report
Subject contents	Methodology for drilling projects Selection of drilling, drilling mud and completion technology Hydrogeological and geothermal drilling Health and safety and working methodology of the geologist at the drilling site Design of borehole operations		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Course work for a grade	51.0%	100.0%
