

Subject card

Subject name and code	Underground waters protection - exercises, PG_00091082						
Field of study	Geology						
Date of commencement of studies	October 2025		Academic year of realisation of subject			2027/2028	
Education level	Bachelor's studies		Subject group			Obligatory subject group in the field of study	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	3		Language of instruction			Polish	
Semester of study	5		ECTS credits			1.0	
Learning profile	academic		Assessment form			credit	
Conducting unit	Department of Geophysics -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Leszek Łęczyński				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		10.0		10.0	35
Subject objectives	Making analyses of migration of pollutants, designation of a protection zone for water intakes.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GEOLL3_U01] is able to apply basic measurement and analytical techniques in the field and in the laboratory, plans to conduct research and measurements	is able to apply basic measuring and analytical techniques in the field and laboratory, and to plan investigations and measurements in the field of groundwater protection	[SU3] text preparation/written work
	[GEOLL3_W02] knows and understands the terminology appropriate in science and natural sciences	knows and understands groundwater-specific terminology	[SW3] text preparation/written work
	[GEOLL3_U06] is able to identify geological objects and combine them with geological processes and anthropogenic environmental transformations	is able to identify geological objects and link them to hydrogeological processes and anthropogenic transformations of the groundwater environment	[SU3] text preparation/written work
	[GEOLL3_W05] knows the structure and geological development of selected regions in Poland and in the world	knows the structure and geological development of selected regions in Poland and the world in relation to groundwater protection	[SW3] text preparation/written work
	[GEOLL3_W07] knows the anthropogenic transformation of the natural environment, including the effects of the exploitation of mineral resources	is familiar with anthropogenic transformation of the natural environment, including the effects of groundwater exploitation	[SW3] text preparation/written work
	[GEOLL3_U02] has the skill of analytical and synthetic way of reasoning leading to correct inference based on the results obtained or the facts presented	has the ability to reason analytically and synthetically, leading to correct conclusions based on the results obtained or facts presented in terms of groundwater protection	[SU3] text preparation/written work
Subject contents	Calculation of vertical migration of pollutants in the aeration zone. Delineation by graphic method of the indirect protection zone of a typical groundwater intake. Give a presentation on a selected issue or example of threat and protection of groundwater from pollution.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	credit work	51.0%	100.0%
