

Subject card

Subject name and code	Communication Disorders of Autistic People and Basics of Behavioural Therapy, PG_00151545						
Field of study	Logopedics						
Date of commencement of studies	October 2026		Academic year of realisation of subject		2027/2028		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Subject group related to practical vocational preparation		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		2.0		
Learning profile	practical		Assessment form		credit		
Conducting unit	Institute of Logopaedics -> Faculty of Languages -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Anna Walencik-Topilko				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		2.0		28.0	50
Subject objectives	The aim of the course is to familiarize students with the specificity of communication disorders occurring in children diagnosed with autism and otherpervasive developmental disorders. The principles of diagnosing these disorders as well as planning and implementing individualeducational and therapeutic programmes, with particular emphasis on programmes aimed at stimulating the development of speech and language.To familiarize students with the theoretical foundations of behavioral therapy and its goals.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[LOGMU2_K01] He is ready to critically evaluate his linguistic (including speech therapy) knowledge and to modify and supplement it.	independently strives to supplement knowledge and skills in the field of diagnosis and therapy of patients with autism spectrum, extended by the dimension interdisciplinary	[SK4] test/exam - oral or written
	[LOGMU2_W01] Has a structured, in-depth and extended knowledge and knows at an extended level the terminology of linguistics and speech therapy (including selected terminology in a foreign modern language).	knows the diagnostic criteria for autism and other pervasive developmental disorders according to ICD-10 and DSM-IV and DSM V, understands the differences between them. Has knowledge about the early signs of autism, with particular emphasis on communication disorders occurring in their course and therapy behavioral	[SW4] test/exam - oral or written
	[LOGMU2_U04] Can independently diagnose speech development disorders, language problems, speech disorders and intake difficulties, identify their etiology and program speech therapy according to the disorder, including in the case of complex medical disorders, including neurological disorders.	can independently diagnose speech and language disorders (and difficulties with food intake) typical for children with autism and other complex developmental disorders, select the appropriate therapeutic procedure (K_U04), • is able to cooperate with representatives of other professions (psychiatrists, psychologists, pedagogues, teachers) in the development and implementation of the effective programmes to support speech and language development in children and adolescents with autism and other pervasive disorders	[SU4] test/exam - oral or written
	[LOGMU2_U03] He has the ability to interpret, analyze the causes and course of linguistic and communicative processes and phenomena, substantively argue using his own views and those of other authors, formulate conclusions and create synthetic summaries using appropriate terminology.	selects and integrates information using various sources and current specialist terminology and formulates critical judgments on this basis concerning autism analyzes different points of view on autistic disorders and strives to synthetic summaries	[SU4] test/exam - oral or written
	[LOGMU2_W04] Has an in-depth, structured knowledge of linguistic development in norm and pathology and the factors affecting its course.	can characterize the functioning of children diagnosed with autistic disorders and know about the possible causes of this disorders	[SW4] test/exam - oral or written
	[LOGMU2_W05] He has the knowledge to independently diagnose speech and feeding disorders in children with complex neurological disorders and genetic defects.	is able to characterize and assign symptoms of language disorders to pervasive disorders with the autism spectrum, including - understands the dependence of between diet and symptom severity	[SW4] test/exam - oral or written
Subject contents	Classification (differential) diagnosis of pervasive developmental disorders: diagnostic criteria for autism, Asperger's syndrome and impairment according to ICD-10 and DSM-IV and V. Causes and prevalence of autism and other pervasive developmental disorders. Early signs autism and other pervasive developmental disorders, with particular emphasis on communication disorders occurring in their course. Characteristics of communication disorders occurring in autism. Therapy for children on the autism spectrum.
