	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	75		4.0		96.0	175
Subject objectives	The aim of the course is to familiarize students with the scope and essence of the European Union's finances.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[FiRL3_W02] The student has advanced knowledge and understanding of the functioning of the domestic and international financial market and financial instruments and institutions.	The student identifies the characteristics of the EU's finances, describes the functioning of financial markets, as well as the financial instruments and institutions of the European Union.	[SW4] test/exam - oral or written [SW5] implementation of a problem task
	[FiRL3_W03] The student knows and understands, to an advanced degree - from the perspective of finance and accounting - the internal and external relations of institutions and organizations with particular emphasis on financial security systems.	The student identifies and illustrates the financial relationships between economic entities, financial institutions, and organizations within the European Union, including characterizing the EU convergence criteria, the consumer protection system in the EU financial services market, and the Single Supervisory Mechanism overseeing the European banking sector at the EU level.	[SW4] test/exam - oral or written [SW5] implementation of a problem task
	[FiRL3_U06] The student can use and integrate knowledge from management and quality sciences, as well as economics and finance, to resolve dilemmas and solve complex problems that arise in professional work in finance and accounting.	The student analyzes and interprets complex economic processes and phenomena occurring within the European Union, using appropriate tools of financial analysis, strategic, budgetary, and tax planning, as well as knowledge from management and quality sciences, economics, and finance. The student examines exchange rate and foreign investment risks, selects instruments and methods for hedging against them, and analyzes international financial instruments used in the activities of various economic entities.	[SU2] presentation/project/paper/report [SU5] implementation of a problem task
