University of Gdańsk

Subject card

Subject name and code	Web Applications Development, PG_00178698		
Field of study	Informatics and Econometrics		
Date of commencement of studies	October 2026	Academic year of realisation of subject	2026/2027
Education level	Bachelor's studies	Subject group	Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study
Mode of study	part-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	5.0
Learning profile	academic	Assessment form	credit
Conducting unit			
Name and surname of lecturer (lecturers)	Subject supervisor	dr Sławomir Radomski	
	Teachers		

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	8.0	0.0	24.0	0.0	0.0	32

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	32	2.0	91.0	125

Subject objectives

1. Familiarizing students with the syntax of HTML.

2. Familiarizing students with the changes introduced in HTML 5.
3. Familiarizing students with CSS technology.
4. Familiarizing students with the RWD concept of responsive websites.
5. Familiarizing students with Flexbox and Grid.
6. Familiarizing students with Bootstrap technology.
7. Practical skills in using HTML, CSS, RWD, Flexbox, Grid and Bootstrap technologies in sample projects.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[IiEL3_U12] Can design and implement IT systems to enhance business operations and effectively utilize modern ICT technologies for management and business communication	The student is able to design and implement IT systems supporting enterprise operations and use modern technologies: such as HTML, CSS, RWD, Flexbox, Grid and Bootstrap.	[SU2] presentation/project/paper/ report [SU5] implementation of a problem task
[IiEL3_W06] Knows and understands, to an advanced degree, the processes and methods of creating, developing, and providing appropriate conditions for using informatics or statistics tools, particularly those that improve human and organizational functioning	The student at an advanced level knows and understands the processes and methods of creating, developing and ensuring appropriate conditions for the use of IT tools, in particular those that improve the functioning of people and organizations. For this purpose, he uses HTML, CSS, RWD, Flexbox, Grid and Bootstrap technologies.	[SW4] test/exam - oral or written [SW2] presentation/project/paper/ report
[IiEL3_U02] Can select or construct econometrics, informatics or statistics tools and apply them to describe and solve economic and social problems	The student is able to select or construct IT tools and use them to describe and solve economic and social problems using HTML, CSS, RWD and Bootstrap.	[SU2] presentation/project/paper/ report [SU5] implementation of a problem task

Subject contents

1. Introduction to HTML5: HTML basics, tags and attributes, Key principles, HTML5 document structure, HTML5 language elements.

2. Cascading Style Sheets (CSS) in web design: introduction to CSS; selectors, styling forms; comments, margins; element borders; element images and background colors; using classes, naming; absolute and relative positions.
