

**Subject card**

<b>Subject name and code</b>	General planning - project, PG_00191743						
<b>Field of study</b>	Spatial Management						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2027/2028		
<b>Education level</b>	Bachelor's studies	<b>Subject group</b>			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	2	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	4	<b>ECTS credits</b>			7.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			credit		
<b>Conducting unit</b>	Institute of Socio-Economic Geography and Spatial Management -> Faculty of Social Sciences -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr inż. Joanna Poczobut				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	0.0	90.0	0.0	0.0	0.0	90
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	90		0.0		85.0	175
<b>Subject objectives</b>	Getting acquainted with the procedure for creating a planning document such as a General Plan. Acquisition of skills in creating a plan, practising the creation of its individual elements for a specific area based on teamwork.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GPL3_W01] has an advanced knowledge and understanding of the interdisciplinary nature of spatial planning and the need for multidimensional approaches in spatial policy	recognizes the interdisciplinary nature and necessity of different approaches in the process of creating the Study of Conditions and Directions of spatial development	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[GPL3_U01] formulates and solves complex and unusual problems of spatial management in accordance with the principles of sustainable development and spatial order	constructs basic planning documents solving complex as well as atypical problems occurring in space striving for spatial order and sustainable development	[SU5] implementation of a problem task [SU6] demonstration of practical skills
	[GPL3_K02] is ready to critically assess knowledge and obtained content with regard to methods and forms of spatial development, sustainable development and spatial order	discusses and critically evaluates its own project and projects prepared by other teams	[SK1] oral statement/conversation/discussion
	[GPL3_U05] selects the appropriate spectrum of legal acts and applies appropriate formal and legal procedures in the field of spatial management	selects the appropriate legal acts and procedures in the process of designing the elements of the Study of the conditions and directions of spatial development	[SU5] implementation of a problem task
	[GPL3_U06] uses specialist language in a debate with specialists in the field of spatial planning and management	uses specialized language from the field of spatial management in debate with representatives of planning practice	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report
	[GPL3_U08] performs complex research tasks or demonstrates expertise in the field of spatial management under the guidance of a scientific supervisor, alone and in a team, and presents the results of the research in a written and oral form in Polish and in a foreign language	carries out a complex planning task in a team and prepares its graphical and textual presentation	[SU2] presentation/project/paper/report [SU3] text preparation/written work

<p>Subject contents</p>	<p>Student teamwork; draft of General plan for a selected municipality.</p> <p>A. GENERAL ISSUES AND INFRASTRUCTURE</p> <ol style="list-style-type: none"> <li>1. Basic concepts: spatial planning act, local development plan, master plan, urban register.</li> <li>2. Discussion of the contents of the master plan. Analysis of the existing plan of the selected municipality. Concept of diagnosis of the municipality.</li> <li>3. Discussion of the diagnosis of municipalities developed by students - presentations.</li> <li>4. Development model of the developed municipality.</li> <li>5. Strategic SWOT analysis of the developed municipality.</li> <li>6. Concepts: agglomeration, metropolis, urban functional area, inter-municipal and district-municipal unions, national and international cooperation, suburbanization.</li> <li>7. Transportation: classification, organizer of public mass transport, carrier, sustainable urban mobility, plan for sustainable development of public mass transport; road classes and categories.</li> <li>8. Infrastructure: division, technical infrastructure.</li> <li>9. Balance of land for development - making calculations in MS Excel. Planning zones in the municipality, balance of zones.</li> <li>10. Public purpose investments, public purposes.</li> <li>11. Compulsory drafting of the LSDP. Areas for which MPZP's are not prepared.</li> </ol> <p>B. and C. NATURAL AND CULTURAL ENVIRONMENT ISSUES</p> <p>Part 1:</p> <ol style="list-style-type: none"> <li>1. Identification of formal and legal requirements for the preparation of General Plan in terms of analysis of environmental and cultural conditions.</li> <li>2. Identification of sources and collection of spatial data</li> <li>3. Resources and potentials of the natural (valuation methods) and cultural environment</li> <li>4. Valorization and protection of environmental resources - as part of the ecophysiological study</li> <li>5. Identification, valorization and protection of cultural resources (with examples of smaller areas and for a selected municipality)</li> <li>6. Objects and areas protected under separate regulations</li> <li>7. Environmentally valuable areas, ecological corridors and ecological matrix in planning</li> <li>8. Identification of areas of special flood hazard, landslides, areas for which a protective pillar is designated in the mineral deposit</li> </ol> <p>Part 2:</p> <ol style="list-style-type: none"> <li>1. Determination of development directions and functional zones</li> <li>2. Indication of areas with natural functions</li> <li>3. Indication of areas with spatial and cultural values</li> <li>4. Areas in need of transformation, degraded areas</li> <li>5. Areas where devices producing energy from renewable energy sources will be deployed</li> <li>6. Principles of protection of the environment and its resources, protection of nature, cultural values, landscape, including cultural landscape and spas</li> <li>7. Author's conclusions for the selected municipality</li> <li>8. Graphic and textual development of the General Plan.</li> </ol>
<p>Prerequisites and co-requisites</p>	<p>Knowledge of the subject matter of the subjects:</p> <ol style="list-style-type: none"> <li>1. Socio-economic determinants of spatial economy</li> <li>2. Determinants of sustainable development in spatial economy</li> <li>3. Architectural and urbanistic determinants of spatial economy</li> <li>4. Methods of spatial analysis</li> </ol>

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		Development of the General Plan of the municipality in three thematic parts of the project A, B and C. The final grade means the average of the 3 thematic grades.	51.0%
