

Subject card

Subject name and code	Biotechnology - mathematics, physics, chemistry Foundations (M01_B2), PG_00192247						
Field of study	Biotechnology						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			6.0		
Learning profile	academic	Assessment form			exam		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Stanisław Oldziej				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	76.0	0.0	0.0	0.0	0.0	76
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	76		10.0		64.0	150
Subject objectives	The student, by completing the program block, will acquire advanced knowledge in the sciences and life sciences necessary for understanding biological phenomena and processes, in particular cellular processes at the molecular level						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[BIOTECHL3_W06] The graduate possesses structured and advanced knowledge of exact and natural sciences necessary to understand biological phenomena and processes, in particular cellular processes at the molecular level.		The student interprets and explains biological phenomena and processes, in particular cellular processes at the molecular level, based on the laws and principles of chemistry, physics and mathematics.		[SW4] test/exam - oral or written		

Subject contents	<p>F1. General chemistry - 16h</p> <p>Theoretical and practical issues of applied chemistry in research and technology: Types of matter: atom, element, isotope, chemical compound; their characteristics and mass (relative and absolute), abundance (mole; Avogadro's number). Atomic issues: structure of the atom, atomic models and subatomic particles and their relevance to technology (principles of research instruments). Basic chemical laws in practice: conservation of mass, volume ratios, Dalton's and Clapeyron's gas laws. Inorganic compounds: oxides, hydrides, hydroxides, acids, salts; structure, obtaining, chemical properties, potency. Chemical equations: synthesis, analysis, exchange, redox, specific reactions, stoichiometry. Solutions: real, standard, standard, standard, weight, buffer (types, composition, capacity, selection criteria), electrolytes, ionic dissociation, pH scale, pH measurement methods, pH indicators, protolytic reactions in aqueous salt solutions. Ways of expressing concentrations of solutions: percent concentrations, molar concentrations, ppm, ppb. Equilibrium reactions: thermodynamic equilibrium, the rule of perversity, energy effects, bioprocesses, optimization of chemical and biological processes.</p> <p>F2 Bioorganic chemistry - 20h</p> <p>Concept of acidity/alkalinity in organic chemistry - isomerism: constitutional, geometric, configurational, conformational - groups of organic compounds, their nomenclature and properties - mechanisms in organic chemistry (nucleophilic, electrophilic and free radical substitution, nucleophilic and electrophilic addition, elimination) - properties and reactions of alcohols and thiols - properties and reactions of aldehydes and ketones - properties and reactions of carboxylic acids and their derivatives - properties and reactions of aliphatic, aromatic, heterocyclic amines</p> <p>F3. Mathematics - 20h</p> <p>Sequences (number e) - Overview of elementary functions (inverse function) - Boundary and continuity of functions, properties of continuous functions - Differentiation of functions, applications of derivative - Indeterminate integral of a function, selected methods of integration - Definite and improper integral, applications of integration</p> <p>F4. Elements of biophysics - 5h</p> <p>Selected issues of nuclear physics: properties of nuclear forces, nuclear transformations, law of radioactive decay, interaction of nuclear radiation with matter, application of isotopes in other sciences - sedimentation methods (centrifugation) in biological sciences</p> <p>F5 Physics - 15h</p> <p>Tools of physics and its relations with other sciences. - Interactions in nature - Elements of kinematics: description of motion of a material point, types of motion, systems of reference, relativity of motion. Elements of dynamics: definition of force, Newton's principles of dynamics. Law of universal gravitation. Work, energy, power. Principles of conservation in mechanics. - Elements of rigid body mechanics. - Oscillatory and wave motion: harmonic oscillator, mechanical waves and wave phenomena. Thermodynamics: selected concepts of thermodynamics, kinetic theory of a perfect gas, principles of thermodynamics, reversible and irreversible processes. - Electricity and magnetism: properties and description of electric and magnetic fields. Electric potential. Electric current: Ohm's law, Kirchhoff's laws, current and voltage measurements. Motion of charge in electric and magnetic fields. Magnetic moment. - Electromagnetic waves, their properties and applications.</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 1872 799 1906">Subject passing criteria</th> <th data-bbox="804 1872 1139 1906">Passing threshold</th> <th data-bbox="1144 1872 1482 1906">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 1912 799 1946">Comprehensive integrating exam</td> <td data-bbox="804 1912 1139 1946">50.0%</td> <td data-bbox="1144 1912 1482 1946">40.0%</td> </tr> <tr> <td data-bbox="456 1953 799 1975">F1-F5</td> <td data-bbox="804 1953 1139 1975">51.0%</td> <td data-bbox="1144 1953 1482 1975">60.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Comprehensive integrating exam	50.0%	40.0%	F1-F5	51.0%	60.0%
