

Subject card

Subject name and code	Natural and Human Milieu of the Gdansk Metropolitan Area - lecture, PG_00194279						
Field of study	Geography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	3	ECTS credits			3.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Climate Research Laboratory -> Department of Physical Oceanography and Climate Research -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Mirosława Malinowska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		41.0	75
Subject objectives	The purpose of the course is to familiarize students with past and present processes, shaping the natural and anthropogenic environment of the Gdansk Metropolitan Area.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GEOGRL3-U03] can plan and conduct, independently and as part of a team, simple research in the field of geography under the supervision of a scientific advisor, based on the necessary information from professional literature and other sources	plans and prepares, in a group and based on the necessary literature and other sources, a presentation on the geographical environment of a selected district of one of the cities forming the Gdańsk Metropolitan Area	[SU2] presentation/project/paper/report [SU8] observation of student's independent or team work
	[GEOGRL3-W02] knows and understands key concepts and theories in geography, as well as advanced processes and phenomena related to spatial diversity and the distribution of processes and phenomena on the Earth's surface at various spatial scales, particularly in Poland	knows the key concepts and theories explaining the processes and phenomena occurring in the Tri-City Metropolitan Area that influence its spatial diversity	[SW2] presentation/project/paper/report
	[GEOGRL3-U01] can identify and analyze basic natural and socio-economic processes and phenomena, analyze their causes and course, and formulate and discuss basic issues concerning physical-geographical conditions and the social, economic, and political situation and their changes on various spatial scales	recognises and analyses natural and socio-economic processes and phenomena occurring in the Gdańsk Metropolitan Area, identifies their causes and possible further course and effects	[SU2] presentation/project/paper/report
	[GEOGRL3-K02] is prepared to bear full responsibility for the actions taken actions and adhere to the principles of professional ethics and principles of intellectual honesty, is aware of the importance of a professional approach in professional life professional life	When preparing a presentation, the student is responsible for the scope of work performed, adheres to the principles of professional ethics and intellectual integrity, and demonstrates a professional approach to his/her duties.	[SK2] presentation/project/paper/report [SK8] observation of student's independent or team work
	[GEOGRL3-W05] knows the interactions between the natural and anthropogenic environments on various spatial and temporal scales, with particular emphasis on the processes and phenomena occurring in the area of the South Baltic Coast and Lake District and the conditions of these interactions	knows the interactions between the natural and anthropogenic environments occurring in the Gdańsk Metropolitan Area and their determinants	[SW2] presentation/project/paper/report
	[GEOGRL3-W04] has advanced knowledge of the Earth's geographical environment, understood as a unified system of interconnected and interacting components; its diversity, functioning, and dynamics of change, including the interaction of environmental components in the area of the South Baltic Coast and Lake District	has advanced knowledge of the elements that make up the geographical environment of the Gdańsk Metropolitan Area, forming a unified system of interconnected and interacting components	[SW2] presentation/project/paper/report
Subject contents	<p>1 Introduction 2 Concepts of interaction of natural and anthropogenic environment as (eco)system 3 The concept of urban ecology 4 Historical outline of the Gdansk Metropolitan Area 5 Cultural conditions of the Gdansk Metropolitan Area 6 Unique features of the ecosystem of the Gdansk Metropolitan Area 7 Directions of environmental-anthropogenic development 8 Social responsibility in the management of the ecosystem of the Gdansk Metropolitan Area 9 The Gdansk Metropolitan Area and its location in the region. 10 The Gdansk Metropolitan Area in the lake and coastal landscape 11 The water network of the Gdansk Metropolitan Area: history and present day. 12 Floods and other extreme events in the Tri-City. 13 Water and sewage management and land reclamation in the Gdansk Metropolitan Area. 14 Climate research in former Gdansk. 15 Climate and air quality monitoring network in the Gdansk Metropolitan Area 16 Climate of the Gdansk Metropolitan Area and symptoms of its contemporary change 17 Topoclimate of selected districts of the Gdansk Metropolitan Area - factors and consequences 18 Adaptation to modern climate change in the Gdansk Metropolitan Area and mitigation of its consequences</p>		
Prerequisites and co-requisites	English at the B+ level		

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	assessment of substantive involvement in preparing a group presentation	51.0%	20.0%
	evaluation of the referencing of the selected task	51.0%	80.0%
