

Subject card

Subject name and code	Urban development planning, PG_00195580						
Field of study	Spatial Management						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	academic	Assessment form			exam		
Conducting unit	Division of Socio-Economic Geography -> Institute of Socio-Economic Geography and Spatial Management -> Faculty of Social Sciences -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Joanna Stępień				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	20.0	0.0	0.0	0.0	50
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	50		5.0		20.0	75
Subject objectives	<p>1. To acquire knowledge of the processes and changes occurring in urban spaces.</p> <p>2. To acquire basic skills for developing directions for strategic and spatial development of cities.</p>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GPMU2_U01] formulates and solves complex and unusual problems of spatial management and proposes their innovative solutions, taking into account the unpredictability of spatial processes	Constructs proposals for action within the framework of spatial policies, taking into account the social and economic conditions of cities, with particular emphasis on coastal cities, including the Tri-City.	[SU2] presentation/project/paper/report
	[GPMU2_K04] is ready to develop the profession's achievements, upholding its ethos, observing the principles of professional ethics by themselves and demanding it from others	Demonstrates an active attitude in formulating his own suggestions and resolutions in the process of evaluating urban policies.	[SK2] presentation/project/paper/report
	[GPMU2_K01] is ready to critically assess the possessed knowledge and received content	Initiates tasks and clarifies the priorities and scope of individual or team action in carrying out a specific research task.	[SK2] presentation/project/paper/report
	[GPMU2_U07] performs complex research tasks or expertise in the field of spatial management by interacting with other people, taking a leading role in teams and presenting the results of the research in a written and oral form using specialised terminology	Completes a set of analyzed and critically selected forms, methods and tools for shaping urban spaces, relating them to the specifics of the city.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[GPMU2_W02] defines the complexity of the concept of sustainable development and spatial order, and understands their importance for spatial management	Formulates and interprets the main interdependencies between policies at the local and regional levels in relation to urban spatial development issues.	[SW4] test/exam - oral or written
	[GPMU2_W01] recognises an in-depth degree, the interdisciplinary nature of spatial management and has ordered and theoretically founded knowledge of multidimensional approaches in spatial policy	Recalls the definitions and goals of city planning and relates them to the achievements of other scientific disciplines (geography, history, architecture and urban planning).	[SW4] test/exam - oral or written

Subject contents	<p>A. Problems of the lecture:</p> <p>A.1 Definitions and objectives of city planning; urban space development as an element of local and regional policy, development scenarios</p> <p>A.2 Economic and functional-spatial structure of the city, city budget and development planning</p> <p>A.3 Network systems and elements of transport, technical and social infrastructure in the city</p> <p>A.4 Traditional and contemporary public spaces of cities</p> <p>A.5 Users of the city</p> <p>A.6 Model cities</p> <p>B. Problems of exercises:</p> <p>B.1 Identify the functional and spatial structure of the city</p> <p>B.2 Diagnose the level of economic and infrastructural development of the city</p> <p>B.3 Concepts of social space in the city</p> <p>B.4 Public spaces in the city</p> <p>B.5 Principles and practices of planning the development of the modern city</p>		
Prerequisites and co-requisites	Basic knowledge of the principles of spatial planning and socio-cultural and spatial management conditions, acquired in the course of first degree studies of spatial management.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Credit for the exercise on the basis of the term project	51.0%	50.0%
	Written exam	51.0%	50.0%

Recommended reading	Basic literature	<p>A. Literature required for final course credit:</p> <p>A.1. used during the class</p> <p>Lorens P., Martyniuk-Pęczek J., 2010, Managing the spatial development of cities, Wyd. Urbanista, Gdańsk</p> <p>Parysek J.J., 2005, Polish cities at the turn of the 20th and 21st century. Development and structural transformations, Wyd. Naukowe Bogucki, Poznań</p> <p>Paszkowski Z., 2011, The Ideal City in the European Perspective and Its Relationship to Contemporary Urbanism, Universitas, Kraków</p> <p>A.2. studied independently by the student</p> <p>Gehl J., 2009, Life between buildings, RAM Publishing House, Krakow</p> <p>Hannerz U., 2006, Discovering the city, Jagiellonian University Publishing House, Krakow</p>
	Supplementary literature	<p>B. Supplementary literature</p> <p>Pęski W., 1999, Management of sustainable development of cities, Arkady, Warsaw</p> <p>Słodczyk J., 2001, City space and its transformation, Opole University, Opole.</p> <p>Węclawowicz G., 2007, Social geography of cities.
