Learning outcomes

Course outcome	Subject outcome	Method of verification
[BIOTECHL3_W02] The graduate knows and understands at an advanced level selected processes at the cell, tissue, and organism level, important from the biological point of view	The student knows and understands the mechanisms of energy acquisition and utilization in microorganisms, including aerobic and anaerobic respiration, fermentation, photosynthesis, and chemosynthesis; understands the processes of macromolecule catabolism and anabolism, as well as cellular transport.	[SW4] test/exam - oral or written
