Subject objectives	The aim of the course is to familiarize students with the principles, institutions, and procedures of real estate management in the context of the functioning of public administration and the legal regulations in force in Poland. The course covers issues related to land and building records, spatial planning, subdivision and consolidation of real estate, expropriation and restitution of property, management of public real estate, and oversight of the real estate market. The course also aims to develop practical skills in legal analysis, application of procedures, and evaluation of administrative decisions concerning real estate. The student understands the importance of proper real estate management for the implementation of public tasks and the shaping of spatial and economic order.
