

**Subject card**

<b>Subject name and code</b>	Lean in logistics , PG_00198990						
<b>Field of study</b>	Economics						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2028/2029		
<b>Education level</b>	Bachelor's studies	<b>Subject group</b>			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	3	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	5	<b>ECTS credits</b>			2.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			credit		
<b>Conducting unit</b>	Department of Logistics -> Faculty of Economics -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr Agnieszka Szmelter-Jarosz				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	15.0	0.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	30		0.0		20.0	50
<b>Subject objectives</b>	<p>Understanding the fundamentals of Lean philosophy and its application in logistics processes to eliminate waste and improve operational efficiency.</p> <p>Identifying and analyzing waste (muda) in supply chains and implementing Lean tools such as 5S, Kaizen, and Value Stream Mapping (VSM).</p> <p>Developing skills in optimizing logistics processes using Lean principles.</p> <p>Preparing for the implementation of a culture of continuous improvement in logistics processes and systems.</p>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONL3_W09] has an advanced knowledge of the evolution of theories describing economic entities and organisations as well as public institutions, and has an advanced knowledge of functional links within them	The student has knowledge of the fundamental principles of Lean philosophy and its application in logistics.	[SW4] test/exam - oral or written
	[EKONL3_K05] correctly identifies, diagnoses and resolves professional dilemmas and different options for solutions	The student demonstrates openness to change and a willingness to take initiatives that enhance organizational performance.	[SK5] implementation of a problem task
	[EKONL3_U07] is able to participate in analyses and evaluations of alternative solutions to economic and social problems and to choose the methods and instruments to resolve them rationally	The student can select appropriate Lean tools for specific logistics problems and propose improvement actions.	[SU5] implementation of a problem task
	[EKONL3_W08] has an advanced knowledge of the processes of changing elements, enterprises and whole structures of economic organisations, as well as the processes of changing social institutions, knows what their causes, course, scale, consequences are and what the influence of external stakeholders is on them	Student knows the logistics strategies in companies and supply chains related to philosophies like lean, agile, leagile, and processes related to shaping and change of strategy.	[SW4] test/exam - oral or written
	[EKONL3_U02] is able to use the knowledge of theory and data to analyse concrete economic and social processes and phenomena and to analyse these phenomena using methods developed in economics, finance and management sciences	The student is able to assess the suitability of a given method for solving a specific problem related to the execution of logistics processes, apply it, evaluate the results, and propose optimization actions.	[SU5] implementation of a problem task
	[EKONL3_K04] is willing to think and act in an entrepreneurial manner; adapts to new situations and conditions, takes on the challenges of creative thinking, is resilient in the face of failure, is able to identify risks and assess the risks of failure	The student understands the importance of a continuous improvement culture and can work to optimize processes.	[SK5] implementation of a problem task
	[EKONL3_U08] has the ability to observe, understand and analyse economic and social phenomena and processes using appropriate scientific methods	The student is able to analyze logistics processes to identify waste and indicate potential areas for improvement.	[SU5] implementation of a problem task
	[EKONL3_W06] has an advanced knowledge of selected methods and tools, including statistical and econometric techniques, for describing economic agents and structures as well as social institutions and the processes taking place in them	The student knows the tools and methods used in the Lean approach, such as 5S, Kaizen, and VSM, and can explain their use in the supply chain.	[SW4] test/exam - oral or written
	[EKONL3_U03] is able to analyse the causes and course of specific economic and social processes and phenomena, and accurately analyse these phenomena using adequate methods and tools economic and social	Student can assess the effectiveness of implemented lean practices and propose further optimization needs	[SU5] implementation of a problem task
Subject contents	<ol style="list-style-type: none"> <li>1. <b>Introduction to Lean Philosophy</b> origins, principles, and benefits in logistics</li> <li>2. <b>Methodologies, techniques, and tools of Lean, Agile, and Leagile:</b> 5S, Kaizen and continuous improvement of logistics processes, Lean Six Sigma, Kanban</li> <li>3. <b>Value Stream Mapping (VSM) in logistics</b></li> <li>4. <b>Inventory management according to Lean principles</b> elimination of excess, Just-in-Time; Lean in warehousing</li> <li>5. <b>Lean in reverse logistics and TPM (Total Productive Maintenance)</b></li> </ol> <p>Any doubts regarding the issues discussed during classes can be discussed during consultations.</p>		

Prerequisites and co-requisites	Basic knowledge in microeconomics  Basic knowledge in management, including process management		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	51.0%	50.0%
	case study	51.0%	50.0%
