

Subject card

Subject name and code	Transport systems and processes , PG_00199001						
Field of study	Economics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2028/2029		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			5.0		
Learning profile	academic	Assessment form			exam		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Ryszard Rolbiecki				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	15.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		0.0		65.0	125
Subject objectives	The subject aims to familiarize students with the basic industry terminology, essence, systematics, principles of development of transport systems as a whole, taking into account the integration of individual transport subsystems and the role of transport infrastructure as a basic, next to means of transport, factor of production of transport services. The subject also aims to present mechanisms related to the functioning of the transport market, including costs of providing services, price formation, transport exchanges. In addition, the subject aims to identify transport processes, their specificity and importance in supply chains in the light of growing needs (demand for transport) and requirements of cargo operators.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONL3_W02] has an advanced knowledge of the different types of existing business entities and organisations and public institutions	The student has advanced knowledge of entities and institutions responsible for shaping the development and functioning of the transport system, as well as entities operating in the TSL sector	[SW4] test/exam - oral or written
	[EKONL3_W07] has an advanced knowledge of the economic and financial principles of the functioning and management of economic entities and organisations as well as the legal, organisational, moral and ethical norms and rules governing the functioning of public institutions	The student has advanced knowledge of the principles of development and mechanisms of operation of transport systems.	[SW4] test/exam - oral or written
	[EKONL3_U01] can correctly interpret economic and social phenomena and apply knowledge of economics, finance and management sciences to explain economic phenomena	The student is able to correctly interpret the processes and phenomena occurring in the transport system and use the acquired knowledge in practical applications.	[SU4] test/exam - oral or written
	[EKONL3_U03] is able to analyse the causes and course of specific economic and social processes and phenomena, and accurately analyse these phenomena using adequate methods and tools economic and social	The student is able to explain the causes and course of transport processes and phenomena using adequate research tools and methods.	[SU4] test/exam - oral or written
	[EKONL3_K04] is willing to think and act in an entrepreneurial manner; adapts to new situations and conditions, takes on the challenges of creative thinking, is resilient in the face of failure, is able to identify risks and assess the risks of failure	The student has the competence to creatively propose solutions to identified problems related to the development of the transport system and the course of transport processes	[SK4] test/exam - oral or written
[EKONL3_W04] knows the types of economic and social ties and the regularities governing them	The student has knowledge about the processes and phenomena occurring in the transport system and market and is able to identify the relationships and regularities between them.	[SW4] test/exam - oral or written	
Subject contents	<ol style="list-style-type: none"> 1. The essence and systematics of transport systems 2. Integration of transport subsystems 3. Transport infrastructure management, 4. Mobility management 5. Functioning of transport exchanges 6. The essence of transport processes 7. Market processes in transport 8. Demand and supply in the transport market 9. Transport costs and price formation 10. Innovative processes in transport <p>Any doubts regarding the issues discussed during classes can be discussed during consultations.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Correctness of answers given to test questions or oral examination questions	51.0%	100.0%
