

Subject card

Subject name and code	Statistical Analysis in Business Projects, PG_00199067						
Field of study	Economics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2028/2029		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			2.0		
Learning profile	academic	Assessment form			exam		
Conducting unit	Department of Statistics -> Faculty of Management -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Olga Komorowska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		20.0	50
Subject objectives	The student's knowledge and understanding of the issues of statistical research used in the implementation of business projects. Acquiring the ability to critically evaluate research results, understanding the strengths and weaknesses of incomplete and full research. The ability to choose the appropriate analytical method for the available data and the stated purpose of the study.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONL3_W06] has an advanced knowledge of selected methods and tools, including statistical and econometric techniques, for describing economic agents and structures as well as social institutions and the processes taking place in them	Student describes the known data analysis methods. The student understands the strengths and weaknesses of incomplete and full research.	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task
	[EKONL3_K02] is aware of the level of knowledge in the field of economics and understands the need to deepen and update this knowledge throughout life	Ability to discuss data and draw conclusions from a read scientific article.	[SK1] oral statement/conversation/discussion
	[EKONL3_U04] can predict and forecast the course of economic and social processes and phenomena	The student identifies the appropriate method in relation to the available data.	[SU1] oral statement/conversation/discussion [SU5] implementation of a problem task
	[EKONL3_U10] has the ability to prepare oral presentations, in Polish and in a foreign language, on economic and social issues, using specialist terminology, theoretical approaches, principles of collecting various sources of data, their description and interpretation, and making inferences from scientific literature, and is able to take an active part in a debate	The student knows various data sources and is able to interpret data provided by institutions such as the Central Statistical Office. The student is able to pose a problematic question to a scientific article he has read.	[SU1] oral statement/conversation/discussion
[EKONL3_K06] is willing to be guided in his professional life by business ethics and corporate social responsibility, to respect others and to be loyal to his employer	Able to cooperate and work in a group.	[SK5] implementation of a problem task	
Subject contents	<ol style="list-style-type: none"> 1. Analysis in graphical form presents data. 2. Alternative transformations. 3. Measurement scales 4. Methods of organizing a linear set of objects (ranks and Hellwig) 5. Estimation 6. Odds ratio 7. Data quality 8. Data sources <p>Doubts or interpretation problems related to the data analysis, which are also resolved during the connection.</p>		
Prerequisites and co-requisites	Knowledge of the basics of statistics.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Oral answer	0.0%	30.0%
	Project/Written work	0.0%	40.0%
	Work in classes	0.0%	30.0%
Recommended reading	Basic literature	Wybrane pozycje są dostępne w języku polskim.	
	Supplementary literature	Wybrane pozycje są dostępne w języku polskim.	
	eResources addresses		
Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. Why should pie charts be avoided? 2. How does the Central Statistical Office collect data on wages in Poland and what kind of information can we obtain in this regard on the website www.stat.gov.pl. 3. For what purpose is variable standardization used? 4. Give the disadvantages of the linear ordering method, the so-called Hellwig method. 		
Work placement	Not applicable
