

Subject card

Subject name and code	Basics of Machine Design and Engineering Graphics - lecture, PG_00199125						
Field of study	Marine Hydrography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			1.0		
Learning profile	practical	Assessment form			credit		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Leszek Flis				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	12.0	0.0	0.0	0.0	0.0	12
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	12		2.0		11.0	25
Subject objectives	Teaching the basics on the notation of construction, structure and operation of machine elements principles of their calculation and design						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[HML3-K02] is ready to correctly determine the priorities in professional work for the implementation of a task specified by himself/ herself or others	is ready to set priorities in their professional work in order to carry out tasks set by themselves or others in areas requiring basic technical knowledge of the construction, design, and engineering of technical equipment	[SK2] presentation/project/paper/report [SK8] observation of student's independent or team work
	[HML3-W01] knows and understands, at an advanced level, selected facts, phenomena and processes, as well as methods and theories concerning them, explaining the complex relationships between them, constituting basic general knowledge in the field of scientific disciplines forming the theoretical foundations specific to the field of study	knows at an advanced level the concepts of standardisation in the design and unification of machine components and assemblies	[SW2] presentation/project/paper/report
	[HML3-W03] knows and understands, at an advanced level, directions of development and the latest discoveries in the field of scientific disciplines forming the theoretical basis appropriate to the field of study	knows at an advanced level methods of designing machine components and criteria for evaluating the design of machine components and the relevance of these criteria	[SW2] presentation/project/paper/report
	[HML3-W12] knows and understands, at an advanced level, the key processes occurring in the life cycle of devices, facilities, and technical systems	knows at an advanced level the principles of machine design using CAD/CAE computer methods;	[SW2] presentation/project/paper/report
	[HML3-U01] is able to plan and conduct experiments, including computer simulations, interpret the results obtained and draw conclusions	is able to plan and carry out experiments, including computer simulations, interpret the results obtained and draw conclusions on the prototyping of basic machine structures	[SU2] presentation/project/paper/report
	[HML3-U04] is able to use analytical, simulation and experimental methods to identify, formulate and solve engineering tasks	is able to use analytical, simulation and experimental methods to identify, formulate and solve engineering tasks in the design of basic machine parts	[SU2] presentation/project/paper/report
[HML3-U10] is able to design - in accordance with the given specification - and make a simple device, object, system or implement a process typical for the field of study, using appropriately selected methods, techniques, tools and materials	is able to design according to a given specification a selected machine part using CAD/CAE computer aided design techniques	[SU2] presentation/project/paper/report	
Subject contents	<p>Engineering Graphics: Projection. Principles of orthogonal projection in technical drawings. Dimensioning. Basic types of mechanical technical drawings. Tolerance and fit. Indicating the surface finish of objects. Rules for creating drawings of machine parts and connections. Application of CAD in creating technical documentation.</p> <p>Fundamental of Machine Design: Designing ship structural components. Calculating allowable stress for static and fatigue loads. Detachable connections. Non-detachable connections. Bearings. Flexible elements. Couplings and brakes. Shafts and axles. Gears. Ship structural components. Fundamentals of computer-aided engineering (CAE) calculations.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project or presentation	51.0%	100.0%
Recommended reading	Basic literature	DOBRZAŃSKI T.: Rysunek techniczny maszynowy. WNT, Warszawa 2014. (in Polish) SZOPA T.: Zasady projektowania i obliczeń inżynierskich. Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa 2013. (in Polish)	
	Supplementary literature	SINGH A.: Fundamentals of Machine Design. Volume 1 and 2. UK, Cambridge University Press, 2017.
