University of Gdańsk

Subject card

Subject name and code	Project Evaluation and Inspection, PG_00199225		
Field of study	International Economic Relations		
Date of commencement of studies	October 2026	Academic year of realisation of subject	2028/2029
Education level	Bachelor's studies	Subject group	Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study
Mode of study	full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	6	ECTS credits	2.0
Learning profile	academic	Assessment form	credit
Conducting unit			
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Tomasz Laskowicz	
	Teachers		

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	0.0	0.0	0.0	15

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	15	2.0	33.0	50

Subject objectives

The purpose of the course is to present the system of evaluation and control of projects, especially European projects. Students through active participation in lectures and discussions understand the process of project evaluation and its importance. Students gain basic knowledge of project financial flows and about the system of payment requests in European projects.

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[MSGL3_U06] can identify selected risks related to international operations of enterprises and assess their consequences correctly	Based on the acquired knowledge, the student analyzes and identifies potential sources of risk to the implementation of the project.	[SU2] presentation/project/paper/ report [SU5] implementation of a problem task
	[MSGL3_U05] can use regulations and standards which determine business activity, as well as accounting principles in order to solve specific tasks related to the activity of enterprises	The student constructs the project evaluation system and the project control area. Analyzing the course of processes in projects, he determines the criteria used for evaluation and, based on the data provided, is able to assess the degree of performance in the project.	[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report
	[MSGL3_W15] has an advanced knowledge of management of an economic entity on the international market; knows and understands strategies and marketing tools used in this management	The student explains how the evaluation process affects the improvement of project management processes in various business entities in an international environment.	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task
	[MSGL3_W12] has a knowledge of the nature, functioning and sources of changes occurring in the structures of economic entities and organisations (in particular those which operate on the international market); understands the causes, course, scale and consequences of these changes	The student describes the risks that occur in projects. He or she understands their consequences and can identify references to controls in projects.	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task
	[MSGL3_W10] has an advanced understanding of selected methods and tools, including IT tools and data acquisition techniques, which make it possible to describe and analyse economic entities operating on the international market; knows the processes and phenomena occurring in them and between them, and processes supporting decision-making	The student points out the various tools used in the evaluation and control of projects, including information technology	[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report
	[MSGL3_W04] has an advanced knowledge of different types and essential elements of the structures of economic entities and organisations, and public institutions	The student distinguishes between the concepts of evaluation and control in projects. He/she is able to explain its importance for achieving specific project goals and results.	[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report

Subject contents	1. Definitions, objectives, meaning and types of evaluation. Differences between control and evaluation in projects. Development of the concept of evaluation in the context of development, public and especially European projects. The role of the evaluation process in public policies and projects. 2. Selected aspects of evaluation research. Stages of study preparation. Methods and techniques used in evaluation research. Techniques of project evaluation. 3.
