

Subject card

Subject name and code	Ecology - lecture, PG_00199796						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	academic	Assessment form			exam		
Conducting unit	Department of Marine Ecosystems Functioning -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Aleksandra Zgrundo				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	2.0	43.0	75		
Subject objectives	Presentation of ecology as a scientific discipline using specific and proper concepts and research methods. It is assumed that the student, in addition to knowledge of basic concepts and techniques related to the study of ecological systems, will understand the importance of abiotic and biotic factors and processes influencing the structure and functioning of ecosystems. In addition, student will understand the importance of the impact of human activity on the functioning of the Earth's ecosystems and will learn the assumptions of the idea of sustainable development.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[OCEANL3-W02] has a broad knowledge and understanding of physical, biological, chemical, and geological processes and phenomena occurring in aquatic environments, with particular emphasis on the marine environment		Knows and understands the basic processes and phenomena occurring between living and non-living elements of the environment.		[SW4] test/exam - oral or written		
	[OCEANL3-U12] is able to systematically expand and update oceanographic knowledge and enhance professional qualifications		Is able to systematically expand and update ecological knowledge.		[SU4] test/exam - oral or written		
Subject contents	Ecology the aim and subject of research, basic concepts: habitat, ecological niches, environment, environmental factors and their impact on organisms, the concept of a limiting factor in relation to the law of minimum and ecological tolerance, life forms, ecological spectra. Methodology of basic ecological research. Structure, dynamics and functioning of populations, biocenoses and ecosystems. The phenomenon of homeostasis and ecological succession. Trophic nets. Introduction to evolutionary ecology. Introduction to the issue of biodiversity (definitions, threats, legal regulations). Practical application of ecological tools and theories in the light of the idea of sustainable development						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		exam	51.0%
Recommended reading	Basic literature	Kingsolver R.W. 2006. Ecology on campus: lab manual. San Francisco [etc.], Pearson-Benjamin Cummings Smith T.M., Smith R.L. 2014. Elements of Ecology. San Francisco [etc.], Benjamin Cummings
