

**Subject card**

<b>Subject name and code</b>	Macroeconomics I, PG_00199913						
<b>Field of study</b>	International Economic Relations						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2026/2027		
<b>Education level</b>	Bachelor's studies	<b>Subject group</b>			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
<b>Mode of study</b>	part-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	1	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	1	<b>ECTS credits</b>			9.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			exam		
<b>Conducting unit</b>	Department of Macroeconomics -> Faculty of Economics -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr Andrzej Poszewiecki				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	20.0	20.0	0.0	20.0	0.0	60
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	60		0.0		165.0	225
<b>Subject objectives</b>	The aim of the education is to equip the student with knowledge, skills and competences in the field of macroeconomics						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[MSGL3_W12] has a knowledge of the nature, functioning and sources of changes occurring in the structures of economic entities and organisations (in particular those which operate on the international market); understands the causes, course, scale and consequences of these changes	The student has basic knowledge about the place of economic sciences (including macroeconomics) in the system of sciences, their nature, methodology and connections with other sciences  The student knows economic processes, phenomena, entities, structures and institutions.	[SW4] test/exam - oral or written
	[MSGL3_W07] has knowledge and understanding of the types of economic ties and regularities governing them, including the principles of functioning of the market and the market mechanism, both in the national and international aspect	The student has basic knowledge about the place of economic sciences (including macroeconomics) in the system of sciences, their nature, methodology and connections with other sciences  The student knows economic processes, phenomena, entities, structures and institutions.	[SW4] test/exam - oral or written
	[MSGL3_W06] has knowledge and understanding of relations between economic entities and public institutions functioning in the national, international and intercultural realms	The student has basic knowledge about the place of economic sciences (including macroeconomics) in the system of sciences, their nature, methodology and connections with other sciences  The student knows economic processes, phenomena, entities, structures and institutions.	[SW4] test/exam - oral or written
	[MSGL3_W04] has an advanced knowledge of different types and essential elements of the structures of economic entities and organisations, and public institutions	The student has basic knowledge about the place of economic sciences (including macroeconomics) in the system of sciences, their nature, methodology and connections with other sciences  The student knows economic processes, phenomena, entities, structures and institutions.	[SW4] test/exam - oral or written
	[MSGL3_W01] has an advanced knowledge of economic sciences, in particular of economics and its place in the system of sciences, including within related disciplines	The student has basic knowledge about the place of economic sciences (including macroeconomics) in the system of sciences, their nature, methodology and connections with other sciences  The student knows economic processes, phenomena, entities, structures and institutions.	[SW4] test/exam - oral or written
	[MSGL3_K02] critically assesses the level of his/her knowledge in the field of economics; is willing to deepen and update this knowledge throughout his/her life	The student understands the need to constantly supplement and deepen the acquired knowledge; is open to new ideas and teaching methods  The student is able to communicate with the environment in and outside the workplace, transfer his knowledge and share his skills using various media.	[SK4] test/exam - oral or written
	[MSGL3_U02] can assess economic and social phenomena occurring in an open economy, interpret necessary statistical data and economic indicators, as well as forecast economic phenomena and processes, using standard methods and tools applied in economic sciences	The student is able to correctly observe and interpret economic phenomena and processes.  The student is able to obtain data to analyze economic processes and phenomena	[SU4] test/exam - oral or written

	Course outcome	Subject outcome	Method of verification
	[MSGL3_U03] can identify and analyse relations between economic entities and public institutions in the national and international environment; using the acquired theoretical knowledge can critically evaluate these relations and indicate directions for their further development or changes	<p>The student is able to correctly observe and interpret economic phenomena and processes.</p> <p>The student is able to obtain data to analyze economic processes and phenomena</p>	[SU4] test/exam - oral or written
	[MSGL3_U01] can correctly interpret and explain economic and social phenomena, analyse their causes, course and connections between these phenomena using the acquired knowledge of economics, finance and international economic relations	<p>The student is able to correctly observe and interpret economic phenomena and processes.</p> <p>The student is able to obtain data to analyze economic processes and phenomena</p>	[SU4] test/exam - oral or written
	[MSGL3_K01] is ready to recognise the importance of knowledge in the field of economics in the process of identifying and solving economic problems and to consult experts in case of difficulties in solving them independently	<p>The student understands the need to constantly supplement and deepen the acquired knowledge; is open to new ideas and teaching methods</p> <p>The student is able to communicate with the environment in and outside the workplace, transfer his knowledge and share his skills using various media.</p>	[SK4] test/exam - oral or written

## Subject contents

1. MACROECONOMICS: MAIN ECONOMIC PROBLEMS What is macroeconomics and what does it deal with? Relations between micro and macroeconomics. Macroeconomics and economic policy. Main macroeconomic problems: unemployment, inflation, economic balance, economic growth. Demand side and supply side, AD aggregate demand curve and SAS aggregate supply curve. The origins of macroeconomics - the Keynesian revolution. Basic macroeconomic models - Keynesian and classical economy. How does the market process solve macro issues? The crisis of economics in the 21st century. What problems can and cannot be solved by economics?

Any doubts related to the lecture topics and questions regarding the course material are addressed during consultation hours. Participation in consultations enables the clarification of substantive issues and deepens the understanding of subject-related concepts.
