E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	27	0.0	73.0	100

Subject objectives

The aim of the course is to familiarise students with the principles of shipping, in particular the legal standards, organisational principles and technical requirements for the operation of sea-going vessels, the functioning of international shipping markets and the role of shipping in maintaining global transport links to enable the development of world trade.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[MSGL3_U01] can correctly interpret and explain economic and social phenomena, analyse their causes, course and connections between these phenomena using the acquired knowledge of economics, finance and international economic relations	The student has the skills related to the realisation of transport tasks using irregular and regular shipping and the use of relevant transport documents. In addition, he/she will be able to explain the functioning of international shipping markets and the tasks of entities involved in the implementation of maritime transport processes. The efficient handling of transport processes also requires the ability to make decisions regarding shipowning companies, in particular their organisation, finances and relations with the international environment. Students are encouraged to seek advice on matters relating to the course and the projects they are working on.	[SU2] presentation/project/paper/ report [SU4] test/exam - oral or written
[MSGL3_W13] has a knowledge of the functioning of business entities in the national and international environment, with particular emphasis on the European Union	The student is familiar with the rules of international trade and has knowledge of the procedures involved in carrying out maritime trade transactions. Students are encouraged to seek advice on matters relating to the course and the projects they are working on..	[SW4] test/exam - oral or written [SW2] presentation/project/paper/ report
