Subject objectives	The aim of the course is to deepen students' knowledge of the functioning of the judiciary and institutions responsible for the protection of law in the Republic of Poland. The course seeks to present their position and role within the system of separation of powers, as well as to analyze their competencies and relationships with other state authorities. A key element of the course is the comparison of Polish constitutional solutions with international standards particularly those developed by the European Union, the Council of Europe, and the case law of the European Court of Human Rights and the Court of Justice of the European Union. Students will develop the ability to critically assess contemporary challenges faced by the judiciary and law enforcement institutions, especially in the context of the rule of law and the protection of human rights.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
