

Subject card

| | | | | | | | |
|--|---|--|-------------------------|--|---|-------------------|------------|
| Subject name and code | Fundamentals of Hydrography - laboratory classes , PG_00201102 | | | | | | |
| Field of study | Marine Hydrography | | | | | | |
| Date of commencement of studies | October 2026 | Academic year of realisation of subject | | | 2027/2028 | | |
| Education level | Bachelor's studies | Subject group | | | Obligatory subject group in the field of study Subject group related to practical vocational preparation | | |
| Mode of study | full-time studies | Mode of delivery | | | at the university | | |
| Year of study | 2 | Language of instruction | | | English | | |
| Semester of study | 3 | ECTS credits | | | 1.0 | | |
| Learning profile | practical | Assessment form | | | credit | | |
| Conducting unit | | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | dr inż. Artur Grządziel | | | | |
| | Teachers | | | | | | |
| Lesson types | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 0.0 | 0.0 | 15.0 | 0.0 | 0.0 | 15 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 15 | | 1.0 | | 9.0 | 25 |
| Subject objectives | Presentation of the role and importance of marine hydrography for human activities at sea, the organization and tasks of the national marine hydrographic service, the principles and organization of conducting hydrographic works and legal aspects of hydrographic activities. | | | | | | |
| Learning outcomes | Course outcome | Subject outcome | | | Method of verification | | |
| | [HML3-U06] is able to make a preliminary economic assessment of the proposed solutions and engineering activities undertaken | is able to use hydrographic terminology in Polish and English | | | [SU2] presentation/project/paper/report | | |
| | [HML3-U04] is able to use analytical, simulation and experimental methods to identify, formulate and solve engineering tasks | is able to select appropriate survey systems for various hydrographic works | | | [SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report | | |
| | [HML3-U02] is able to select and apply basic research techniques and tools in the field of aquatic environment research, as well as plan and carry out measurements, develop the obtained results and interpret them correctly | is able to select and apply basic survey techniques in marine hydrography | | | [SU2] presentation/project/paper/report | | |
| | [HML3-U01] is able to plan and conduct experiments, including computer simulations, interpret the results obtained and draw conclusions | is able to use national and foreign references, literature to assess, perform critical analysis and synthesis of information | | | [SU2] presentation/project/paper/report | | |
| | [HML3-K01] is ready to correctly identify and resolve professional dilemmas, especially in the aspects of security and entrusted property | is ready to correctly identify and resolve professional dilemmas, particularly those related to safety | | | [SK2] presentation/project/paper/report | | |

| | | | |
|---------------------------------|--|----------------------------|---|
| Subject contents | <p>Marine hydrography - its role and importance for human activity at sea</p> <p>Introduction to hydrography. The concept of marine hydrography. Basic definitions. IHO. The importance of hydrographic measurements for human activities at sea.</p> <p>Organization and tasks of the hydrographic service in Poland</p> <p>Organization of the hydrographic service. Tasks of the hydrographic service. State Maritime Hydrographic Service. BHMW. Hydrographic Service of the Navy and Maritime Offices.</p> <p>National and international requirements and standards. Professional qualifications of a hydrographer. Marine hydrographer of categories A and B. Training of hydrographers in Poland. Minimum requirements for hydrographic surveys. Standard S 44, edition 6.0.0. Standards S-5A, S-5B. Publication C-13.</p> <p>Hydrographic works - types and general requirements. The concept of hydrographic works. Maritime administration.</p> <p>Types of hydrographic works. General requirements. Bathymetric measurements. Sonar measurements. Geophysical measurements. Oceanographic measurements. Geodetic measurements. Criteria for the division of hydrographic works. Polish sea areas. Areas of survey work.</p> <p>Stages of performing hydrographic works General principles of conducting survey measurements.</p> <p>Division into stages of hydrographic work. Surveys planning. Technical design and Technical task. Work planning in the central and executive units. Survey equipment and survey units.</p> <p>Marine construction, hydrotechnical and hydrographic measurements</p> <p>Naval construction basic definitions. Deepening of the bottom, shallowing. Bottom reinforcements. Bathymetric plans and bottom cleanliness certificate. Bottom examination report.</p> <p>Navigation devices and systems used in hydrography.</p> <p>Basic devices and measurement systems used in marine hydrography. Principles of using hydrographic measuring devices.</p> <p>The role and importance of navigational and hydrographic protection of human activities at sea. Basic concepts in the field of hydrographic activities.</p> | | |
| Prerequisites and co-requisites | | | |
| Assessment methods and criteria | Subject passing criteria report | Passing threshold 51.0% | Percentage of the final grade 100.0% |

| | | |
