University of Gdańsk

Subject card

Subject name and code	History of Development of Aquaculture - field classes, PG_00201193						
Field of study	Aquaculture – Business And Technology						
Date of commencement of studies	October 2026		Academic year of realisation of subject		2026/2027		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		2.0		
Learning profile	practical		Assessment form		credit		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Ligia Panasiak				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	25.0	0.0	0.0	0.0	25
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	25		2.0		23.0	50
Subject objectives	The aim of the subject is to acquaint students with the history and development of global aquaculture, as well as examples of aquaculture in the Pomeranian region.						

Learning outcomes

Course outcome	Subject outcome	Method of verification
[AKWAL3_W01] has an advanced understanding of the links between achievements in selected fields of science and natural science disciplines, and their potential applications in socio-economic life	Conducting a discussion on the achievements of natural sciences and their utilization in the field of aquaculture.	[SW1] oral statement/ conversation/discussion
[AKWAL3-U01] can plan and perform simple tasks under supervision or independently in the analysis of the aquatic environment, using appropriate methods of description and identification	Performing and planning tasks independently or under supervision in the analysis of the water environment	[SU1] oral statement/conversation/ discussion
[AKWAL3-K01] is ready to assess the risks and threats stemming from working in the laboratory and is responsible for the equipment and teaching materials entrusted to them and for the safety of their own work and that of others	Conscious and safe work in the laboratory, responsibility for the equipment and educational materials used	[SK1] oral statement/conversation/ discussion
[AKWAL3-U10] can prepare an oral presentation of scientific nature or a short description of research done during classes, using appropriate scientific terminology, in Polish or English	Preparing a presentation in Polish/ English on a given topic, including scientific terminology	[SU2] presentation/project/paper/ report
[AKWAL3_W02] has an advanced understanding of chemical, biological, physical processes and phenomena, identifies them, analyses their mechanisms in relation to the aquatic environment, and is aware of the connections between various natural disciplines	Discussion on the processes occurring in the aquatic environment and their connections to aquaculture	[SW1] oral statement/ conversation/discussion

Subject contents

Familiarization with examples of aquaculture-related activities in the Tri-City metropolitan area.

Visit to a facility producing stocking material for salmonid fish in Pomerania.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Preparation of a field trip report	51.0%	100.0%
