

Subject card

Subject name and code	Basic Physiology of Aquacultured Invertebrates - lecture, PG_00201316						
Field of study	Aquaculture – Business And Technology						
Date of commencement of studies	October 2026		Academic year of realisation of subject			2027/2028	
Education level	Bachelor's studies		Subject group			Obligatory subject group in the field of study Subject group related to practical vocational preparation	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	2		Language of instruction			Polish	
Semester of study	3		ECTS credits			1.0	
Learning profile	practical		Assessment form			credit	
Conducting unit	Laboratory of Ecophysiology and Bioenergetics -> Department of Marine Ecology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. Monika Normant-Saremba				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	The aim of the course is to familiarize the student with the basic physiological processes of aquatic invertebrates used in aquaculture and the influence of various biotic and abiotic factors on these processes.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[AKWAL3_W04] has an advanced understanding of the principles of optimization of breeding methods for aquatic invertebrates, and has acquired theoretical and practical knowledge of the diagnostic methods used		Knows and understands the course of basic physiological processes, their connection with the optimization of breeding methods of aquatic invertebrates, and has acquired theoretical and practical knowledge of the diagnostic methods used.		[SW4] test/exam - oral or written		

Subject contents	<p>Food consumption and assimilation.</p> <p>Excretion of metabolic products.</p> <p>Osmo- and ionoregulation.</p> <p>Respiration and energy metabolism.</p> <p>Biochemical composition and energy value.</p> <p>Energy balance and individual production.</p> <p>Biotic and abiotic factors determining the rate of physiological processes and individual production.</p>		
Prerequisites and co-requisites	Knowledge of systematics and basic biology and ecology of farmed invertebrates.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test/ exam	51.0%	100.0%
Recommended reading	Basic literature	<p>Barnabe G., 1994. Aquaculture: Biology And Ecology Of Cultured Species (Ellis Horwood series in aquaculture and fisheries support). CRC Press.</p> <p>Klekowski R.Z., Fischer Z., 1993. Bioenergetyka Ekologiczna Zwierząt Zmiennocieplnych. PAN, Wydział II Nauk Biologicznych, Warszawa.</p> <p>Schmidt-Nielsen K., 2008.
