

Subject card

Subject name and code	Recultivation and Renaturalization of Water - lecture, PG_00201457						
Field of study	Water Management and Protection of Water Resources						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2028/2029		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Subject group related to practical vocational preparation		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			1.0		
Learning profile	practical	Assessment form			credit		
Conducting unit	Centrum Monitoringu i Ochrony Wód -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Julita Dunalska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	To become familiar with the problems of restoration and restoration of water bodies; to prepare for decision-making in order to reduce the inflow of pollutants to surface waters; to acquire the ability to select appropriate restoration and restoration techniques for individual morphometric and catchment characteristics of water bodies.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GWOZWL3-U06] The student has the ability assess the impact of planned investments on value and quality of water resources and propose options for solutions to protect and restore water resources, recognize their weaknesses and strengths as well as opportunities and threats.	Understands the opportunities and risks of implementing the proposed conservation and restoration measures.	[SU4] test/exam - oral or written
	[GWOZWL3-K06] The student has the ability an informed and reliable assessment of the impact of humans on the aquatic environment.	In planning activities, demonstrates an attitude of informed and reliable assessment of the impact of human activities on the aquatic environment.	[SK4] test/exam - oral or written
	[GWOZWL3-W02] The student knows and understands the importance of advanced knowledge in the sciences allowing to understand the processes and phenomena occurring in the hydrosphere, as well as knowledge of the social sciences and of the Earth's geographic environment - as a system of interrelated and interacting components.	Has knowledge of the principles of restoration and restoration of water bodies allowing an understanding of the processes and phenomena occurring in the hydrosphere - as a system of interrelated and interacting components.	[SW4] test/exam - oral or written
	[GWOZWL3-W05] The student has advanced knowledge and understanding of assumptions of the ecosystem approach to management of the environment and human activities in the environment as well as the development directions in the field of applied solutions and scientific research for the protection and restoration of water resources in selected divisions of the national economy.	Is familiar with developments in methods to protect and restore water resources.	[SW4] test/exam - oral or written
Subject contents	<p>- Causes and effects of hydrosphere water degradation as an effect of climate change, anthropopression and agricultural intensification.- Concept of eutrophication and internal loading.- Sources of surface water pollution (point, area, diffuse).- Methods and techniques of water restoration and renaturalization.- Characteristics of restoration methods: engineering and biological techniques.- Restoration methods for lakes (maintenance, technical and ancillary measures).- The role of Citizen Science in planning water restoration and renaturalization activities.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	51.0%	100.0%
