

**Subject card**

Subject name and code	Marine Natural Products - lecture, PG_00201680						
Field of study	Marine Biotechnology						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	1	ECTS credits			2.0		
Learning profile	academic	Assessment form			exam		
Conducting unit	Laboratory of Marine Biotechnology -> Department of Marine Biology and Biotechnology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. Hanna Mazur-Marzec					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		1.0		19.0	50
Subject objectives	Acquisition by student knowledge on the main producers of bioactive marine products (MNPs), structure, activity and biotechnological potential of MNPs (KW_01).						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[MBMU2-KW01] Has an in-depth knowledge and understanding of the significance, limitations and potential applications of natural marine resources in the context of the complex biological, environmental and technological factors influencing the development of biotechnology.		KW_01 Student possesses knowledge about the diversity and biotechnological potential of marine natural products		[SW4] test/exam - oral or written		
Subject contents	Historical background and branches of marine biotechnology, main producers of biotechnologically important MNPs, natural and alternative sources of bioproducts, structural diversity of MNP, low value MNPs (food, feed and energy) and high added value MNPs (enzymes, drugs, cosmeceuticals, nutraceuticals, functional food, food supplements, pigments, biomaterials, antifouling agents), from hits to lead, biotechnological application of MNPs - case studies, from biomass to bioproduct. Model organisms of marine ecosystem interactions (ameba- <i>Legionella</i> , sociobiology of sponges and corals); potential source of MNPs (e.g fluorescent proteins, enzymes)						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	exam		51.0%		100.0%		
	Optionally - partial tests (open questiona)		51.0%		100.0%		

Recommended reading	Basic literature	Selected articles from scientific journals, e.g.: Marine Drugs, Marine Natural Products, provided by the teacher
	Supplementary literature	Marine Natural Products, 2021, Editor Hiromasa Kiyota, Springer
	eResources addresses	
Example issues/ example questions/ tasks being completed	Marine natural products of low and high added value; Valorisation and bioprocessing; Marine proteins, peptides and polysaccharides - main producers, biosynthesis, isolation, structure, bioactivity, biotechnological potential	
Work placement	Not applicable	

Document generated electronically. Does not require a seal or signature.
