

Subject card

Subject name and code	Statistics with elements of mathematics in biological sciences, PG_00203390						
Field of study	Medical Biology						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			2.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Laboratory of Plant Physiology and Toxicology -> Department of Experimental Biology and Plant Biotechnology -> Faculty of Biology -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Agnieszka Baścik-Remisiewicz				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	<p>1. To prepare students to use basic methods of statistical analysis and to apply them in the interpretation of biological phenomena and processes.</p> <p>2. To acquaint students with the tools of mathematics necessary to understand the laws of nature and to describe life processes.</p>						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[BIOLMEDL3_W13] has an knowledge of the methods of statistical analysis and understands their importance in the interpretation of biological phenomena and processes		The graduate presents basic methods of statistical analysis and understands their importance in the interpretation of biological phenomena and processes.			[SW4] test/exam - oral or written	
	[BIOLMEDL3_W08] identifies the tools of mathematics necessary to understand the laws of nature and to describe the processes of life		The graduate identifies the tools of mathematics necessary to understand the laws of nature and the description of life processes.			[SW4] test/exam - oral or written	
	[BIOLMEDL3_K01] understands the need for lifelong learning and to update his/her knowledge of medical biology and related disciplines		The graduate understands the need for lifelong learning and updating knowledge in medical biology, statistics and mathematics and related disciplines.			[SK8] observation of student's independent or team work	
	[BIOLMEDL3_U04] applies basic statistical methods and computer algorithms and techniques to describe phenomena and data analysis		The graduate is able to apply basic statistical and mathematical methods to description of phenomena and analysis of biological data.			[SU4] test/exam - oral or written	

Subject contents	<p>Statistics: Basic concepts of statistics (types of variables, types of scales, rules for approximating numbers, histograms). Descriptive statistics: samples size, arithmetic, geometric and harmonic mean, variance, standard deviation, coefficient of variation, standard error, median and modal value, skewness, confidence interval. Binomial and normal distributions. Statistical hypothesis testing. Homogeneity of variance (Snedecor's F test). Student's t-test. One-way analysis of variance and Kruskal-Wallis test. The chi-square test. Selected non-parametric tests. Correlation and simple regression.</p> <p>Mathematics: Introduction to the calculus of probability. Number sequences and series. Sequences and number series. Derivative of a function and its application. Integral calculus of functions of one variable: the indeterminate and determinate integral, methods of calculating integrals and their application. Real and imaginary numbers. Actions on matrices</p>											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1" data-bbox="451 490 1487 557"> <thead> <tr> <th data-bbox="451 490 794 524">Subject passing criteria</th> <th data-bbox="794 490 1139 524">Passing threshold</th> <th data-bbox="1139 490 1487 524">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 524 794 557">written test</td> <td data-bbox="794 524 1139 557">51.0%</td> <td data-bbox="1139 524 1487 557">100.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	written test	51.0%	100.0%			
Subject passing criteria	Passing threshold	Percentage of the final grade										
written test	51.0%	100.0%
