

Subject card

Subject name and code	Recent Findings in Ocean Research - lecture, PG_00204946						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	4	ECTS credits			2.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Anna Panasiuk				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	The aim of the course is to familiarize students with the latest directions of research in oceanography conducted in scientific centers in Poland and abroad, as well as the latest scientific reports. Lectures will also be conducted in English by invited guests from various scientific and research institutions from Poland and abroad. Participation in the lectures, the opportunity for discussion will also allow the use of specialized terminology in English in practice.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-W04] has an in-depth understanding of the latest research trends in oceanography, as well as the possibilities for practical application of related achievements; evaluates their usefulness and limitations in solving scientific research problems, and critically analyzes and assesses their applicability	knows and understands to an advanced degree the issues and research problems in the field of oceanography	[SW4] test/exam - oral or written
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	Has an advanced knowledge and understanding of oceanographic terminology in English	[SW4] test/exam - oral or written
	[OCEANMU2-K03] is ready to effectively organize his/her own work, is active and persistent and punctuality in completing tasks, is ready to carrying out evaluation of their own activities	is ready to critically evaluate his knowledge and perceived content of the subject matter	[SK4] test/exam - oral or written
[OCEANMU2-U01] is able to formulate and solve complex and unusual problems regarding the functioning of individual components of the marine environment using knowledge from various fields and scientific disciplines and propose solutions	is able to use the current scientific terminology in English in presenting and discussing problems in the field of oceanography	[SU4] test/exam - oral or written	
Subject contents	Presentation of currently conducted research (problems, methods, results). Other aspects of conducting research or working in the scientific, research unit.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test	51.0%	100.0%
Recommended reading	Basic literature	The list of literature will be presented depending on the problems realized during the classes	
	Supplementary literature	The list of literature will be presented depending on the problems realized during the classes	
	eResources addresses		
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable
