

Subject card

Subject name and code	Introduction to Seabed Morphometry - lecture, PG_00205001						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			2.0		
Learning profile	academic	Assessment form			exam		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. Jarosław Tęgowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	Recognition and understanding of methods of bathymetric data processing and quantitative and qualitative description of seabed morphometry.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-W03] has an in-depth understanding of research methods used in oceanography and related sciences, and interprets their mechanisms and interrelationships across different spatial and temporal scales	Is able to use research methods used in oceanography.	[SW4] test/exam - oral or written
	[OCEANMU2-W02] knows and understands complex processes and phenomena occurring in the marine environment, with particular emphasis on the coastal zone, as well as complex relationships between living and non-living elements of the aquatic environment	Is proficient in oceanographic issues, including marine coastal zone processes	[SW4] test/exam - oral or written
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	Understands processes in the sea and coastal zone	[SW4] test/exam - oral or written
	[OCEANMU2-W05] knows and understands the principles of planning and conducting field and laboratory research as well as advanced methods and tools of scientific research, especially in the field of the studied specialty	Is able to use research methods used in oceanography.	[SW4] test/exam - oral or written
Subject contents	Morphometry as a tool and a scientific sub-discipline. Methodology of bathymetric measurements. Bathymetric data interpolation methods. Uneven bottom surface - Numerical Terrain Model. Morphometric description and morphometric parameters. Seabed relief forms. Elements of statistical analysis of morphometric relief forms. Software used in morphometry. Classification of morphological features of bottom surface and bottom sediments. Morphometric reconstruction of bottom-forming processes - a case study.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written exam with open questions (tasks)	51.0%	100.0%
