Subject objectives

Course objectives English version

The aim of the course Technology and the Information Society is to provide students with the knowledge, skills, and competencies necessary to understand the relationship between modern information and communication technologies (ICT) and social, political, cultural, and economic transformations in the information society. The course focuses on developing analytical and critical thinking skills in relation to digital phenomena, as well as fostering the competencies needed to function responsibly in the digital era.

Specifically, the course aims to:

- Introduce students to the fundamental concepts of the information society and digital transformation;
- Analyze the impact of technological development (including the Internet, artificial intelligence, big data, the Internet of Things, blockchain) on social life, work, education, media, and culture;
- Develop competencies related to ethical, legal, and social challenges associated with digital technologies;
- Improve skills in case study analysis, debating, and interpreting data on digital issues;
- Promote critical and responsible use of digital tools, including social media and algorithmic systems.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[DYPL3_U08] Is aware of the relationships between politics, diplomacy, and historical, economic, social, and cultural processes. Can assess them and draw conclusions in the context of politics and diplomacy.		
[DYPL3_W14] Has advanced knowledge of mass media and communication tools and their role in society, also in the context of their use in diplomacy.		
[DYPL3_W13] Has advanced knowledge of democracy, civil society and the essence of public discourse in historical and contemporary diplomacy.		
[DYPL3_W06] Has advanced knowledge of the methods, techniques, and research tools in political science, enabling the analysis of actors, relationships, institutional structures, processes, and phenomena occurring at the national and international level.		
[DYPL3_K08] Uses acquired knowledge and skills to act in an entrepreneurial manner.		
[DYPL3_K03] Can collaborate effectively in a team and set priorities for the completion of specific tasks.		

Subject contents

Course outline English version:

1. Introduction to the course. Information society concepts and contexts
   Overview of the syllabus, grading rules, key definitions.
