Subject objectives

The classes are aimed at teaching the description of archival materials using the standard of archival description available in the computer lab. Students will become familiar with the problems of archival description standards in the international and Polish aspects by critically analyzing and synthesizing them. Students should be able to analyze the structure of an archival ensemble and independently perform the description of archival materials at the level of the archival unit and archival ensemble in the archival information system.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[HISTL3_W11] Knows and understands the economic, legal, ethical and other conditions affecting various types of professional activity related to history, including the concepts and principles of industrial property protection and copyright law.	The student knows and understands the basic economic, legal, ethical and other conditions of various professional activities related to archiving and records management.	[SW5] implementation of a problem task
