	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		2.0		28.0	50
Subject objectives	After completing the series of classes, the student should know the indications and contraindications for speech therapy massage, as well as its principles. The purpose of the exercises is for the student to learn the technique of massage of the face and the inside of the mouth, as well as massage of the neck, head and hands of a child and an adult. During the exercises, students will also learn the principles and course of Shantali baby massage, Peter Walker massage and Butterfly Touch massage.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[LOGJ5_W03] The student knows and understands the complex principles of speech-language pathology prevention and the stimulation of normal speech and language development, as well as an in-depth understanding of the theoretical foundations of intervention strategies for individuals and social groups to the extent necessary for the speech-language pathology program, including in difficult and ambiguous cases. Possesses in-depth knowledge of linguistics and speech-language pathology, enabling them to independently design programs aimed at preventing speech disorders in individuals at risk of developing them.	Has the speech therapy knowledge to independently massage the face and oral cavity to prevent and counteract speech disorders and intake disorders in children and adults. Has the knowledge to independently create a program for the prevention of speech disorders in children at risk of disability.	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
	[LOGJ5_U02] Independently plans and implements original and innovative linguistic and speech therapy projects, in accordance with the development trends of linguistics and speech therapy and related to the selected sphere of speech therapy activity.	Based on the analysis of the collected information about the child, he independently selects the type of massage and innovative work techniques used.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report [SU8] observation of student's independent or team work
	[LOGJ5_W06] Has a structured and in-depth knowledge to program speech therapy for children with coupled developmental problems of complex etiology (cognitive deficits, sensory deficits and neurological damage).	He knows the principles and techniques of facial, internal oral, head, neck and hand massage, as well as Shantali massage, and is able to use this type of interactions in speech therapy practice.	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[LOGJ5_U04] Can independently diagnose speech development disorders, language problems, speech disorders, literacy disorders and intake difficulties, indicate their etiology and program preventive measures and speech therapy according to the disorder, including in the case of complex medical disorders, including neurological disorders.	He is able to independently diagnose speech development disorders and intake difficulties, identify their etiology and create a speech therapy program, taking into account speech therapy massage techniques.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report [SU5] implementation of a problem task [SU6] demonstration of practical skills [SU8] observation of student's independent or team work
	[LOGJ5_U03] He has the ability to interpret, analyze the causes and course of linguistic and communicative processes and phenomena, substantively argue using his own views and those of other authors, formulate conclusions and create synthetic summaries using the appropriate terminology of linguistics, sociolinguistics and ethnolinguistics and medical sciences relevant to speech therapy.	Can independently and comprehensively make a critical analysis of a child's medical and psychological records and use the data collected therein to fully characterize their client.	[SU6] demonstration of practical skills [SU8] observation of student's independent or team work
	[LOGJ5_K04] He is aware of his own limitations and knows when there is a need to turn to experts of fields relevant to speech therapy and committed cooperation with various institutions of health care and supporting educational, cultural and support activities.	He is able to cooperate appropriately with other specialists conducting rehabilitation of the child. Is critical of his own work, knows his limitations and is aware of the need to work in a team of specialists.	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report [SK5] implementation of a problem task
Subject contents	Function of the muscles of the face and neck - muscles of mastication, expression and organs of the head. Types and effects of massage. Principles, indications and contraindications of massage. Techniques of classical massage. Course of speech therapy massage of the face and interior of the oral cavity. Massage of the head and neck. Elements of Shantali massage used as an adjunctive method in speech therapy of a young child with suspected disabilities. Hand massage. The use of Peter Walker's massage in the stimulation of the child's motor development.		
Prerequisites and co-requisites			

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	active attendance in class	75.0%	20.0%
	development of the issue indicated by the instructor	51.0%	40.0%
	Verification of the established learning outcomes - on the basis of the development of the topic indicated by the instructor and oral credit for the content applicable to the exercises.	51.0%	40.0%
