	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		45.0	75
Subject objectives	The aim of the course is to demonstrate the influence of culture on the processes of spatial management and development. To demonstrate how phenomena occurring in society and culture influence the organization, management, and valuing of social space in terms of human activities. The subject of analysis is the relationship between people, culture, and space: Mechanisms of cultural determinants of human behavior Cultural identity, multiculturalism, cultural adaptation, globalization of culture The influence of local (Polish) culture on regional and global culture						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[GPL3_U02] correctly identifies and explains the conditions of spatial management of a particular area and forecasts the impact of basic social processes on the structure of spatial development, and on this basis proposes adequate actions within spatial policy, in particular in relation to Polish maritime areas and voivodeships of northern Poland		Analyses social and cultural processes in order to develop effective spatial policies.			[SU2] presentation/project/paper/report [SU5] implementation of a problem task [SU6] demonstration of practical skills [SU8] observation of student's independent or team work	
	[GPL3_W07] knows and understands the methods and tools for shaping spatial development		List socio-cultural tools for shaping space			[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task	
	[GPL3_W01] has an advanced knowledge and understanding of the interdisciplinary nature of spatial planning and the need for multidimensional approaches in spatial policy		Identifies the importance of social conditions in an interdisciplinary approach to spatial planning.			[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task	

Subject contents	Identification of the site and landscape. Spatial order: indicators; assessment; impact on quality of life; threats; social segregation; poor neighborhoods; affluent ghettos; ethnic and religious enclaves. Cultural analysis of the selected project area Elements of spatial design taking into account socio-cultural conditions Meeting social needs and methods of organizing space: spatial social needs; spatial barriers; entrepreneurial and innovative solutions in adapting spaces for people with disabilities; children; and youth Design tasks: analysis of the cultural context of spatial elements: Cultural context of the university campus Cultural context of urban neighborhoods Cultural context of shopping malls and other commercial spaces Cultural context of mobility: airports, ports, train stations Cultural context of recreation: parks and gardens Prześlij opinię		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	presentation of thematic projects	80.0%	80.0%
	Oxford debate	20.0%	20.0%
