	[OCEANMU2-U11] is able to work individually and cooperate in laboratory and field groups, performs various functions in them, including managerial ones, performs various assigned tasks		Able to work individually and collaborate effectively in laboratory and field teams, able to fulfill various roles, including coordination and management, and diligently perform assigned tasks related to sample collection, testing, and results analysis.		[SU2] presentation/project/paper/report [SU8] observation of student's independent or team work		
	[OCEANMU2-K03] is ready to effectively organize his/her own work, is active and persistent and punctuality in completing tasks, is ready to carrying out evaluation of their own activities		The student is prepared to effectively organize his or her own work in the laboratory and during fieldwork, demonstrates initiative, perseverance, and punctuality in completing tasks related to marine geology research. He or she is prepared to critically evaluate his or her own activities and improve the research procedures used.		[SK8] observation of student's independent or team work		
	[OCEANMU2-W05] knows and understands the principles of planning and conducting field and laboratory research as well as advanced methods and tools of scientific research, especially in the field of the studied specialty		Knows and understands in depth the principles of planning and conducting field and laboratory research in the field of marine geology, as well as advanced analytical methods and research tools used in work carried out in the specialty studied.		[SW1] oral statement/conversation/discussion		

Subject contents	The topics of the classes and the scope of research, laboratory, fieldwork, and literature tasks are determined individually by the student with the thesis supervisor, in accordance with the topic and specifications of the work being performed. The research results are analyzed, interpreted, and a section of the thesis is prepared.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	The level of advancement of research carried out as part of the master's thesis	51.0%	80.0%
	Observation of student work	51.0%	20.0%
Recommended reading	Basic literature	Literature is selected for the student on an individual basis, according to the guidance of the thesis supervisor.	
	Supplementary literature	Literature is selected for the student on an individual basis, according to the guidance of the thesis supervisor.	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Issues relevant to the prepared master's thesis.		
Work placement	Not applicable
