Subject objectives	The course aims to provide knowledge and skills in crisis management and critical infrastructure protection. Students will learn basic concepts, principles, the structure and organization of the crisis management system in Poland. They will acquire skills in risk analysis and assessment, developing crisis management and critical infrastructure protection plans, and coordinating rescue operations. Students will also gain abilities in intersectoral cooperation, continuity management, and responding to incidents involving critical infrastructure.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BNL3_W04] Has advanced knowledge of the functioning of domestic and international security institutions and is able to define the relationships between them. Defines, at an advanced level, the fundamental dilemmas of contemporary civilization.	He understands the basic tasks of institutions and state authorities in the field of crisis management	[SW4] test/exam - oral or written
