University of Gdańsk

Subject card

Subject name and code	MSc workshop I (Laboratory classes), PG_00201459		
Field of study	Physical geography and geoinformation		
Date of commencement of studies	October 2027	Academic year of realisation of subject	2027/2028
Education level	Master's studies	Subject group	Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study
Mode of study	full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	2.0
Learning profile	academic	Assessment form	credit
Conducting unit	Climate Research Laboratory -> Department of Physical Oceanography and Climate Research -> Faculty of Oceanography and Geography -> Rector		
Name and surname of lecturer (lecturers)	Subject supervisor	dr Janusz Filipiak	
	Teachers		

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	0.0	0.0	30.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	10.0	10.0	50

Subject objectives

The primary aim of the Masters Thesis Seminar is to provide academic and technical support to students in the preparation of their Masters thesis, as well as to monitor their progress on an ongoing basis. The topic of the Masters thesis, selected from a list of proposals during the first semester of study as part of the Discussion classes course, relates to one of the subject areas covered by the programme:
- Quaternary geomorphology and geology,
- hydrology, limnology and water protection,
- meteorology and climatology,
- geoinformation and
- interdisciplinary topics combining selected aspects of the above.

The specific aim of the Msc Workshop I course is to provide substantive and technical support to seminar participants in the early stages of preparing their Masters thesis, starting with a review of the current state of knowledge and the definition of the thesiss research problem (research objective, research hypotheses), through to designing the research methodology and commencing the initial stage of analysing the research material.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[GFGMU2_U02] is able to precisely and appropriately use terminology in the field of physical geography and geoinformation in oral statements and written works	Able to proficiently and appropriately apply the terminology of physical geography and geoinformation in oral statements and written works, curriculum content: 1-3.	[SU3] text preparation/written work
[GFGMU2_W06] knows and understands in a deepened extent conceptual apparatus of physical geography and geoinformation, selected Polish and foreign literature on physical geography and principles of preparing and editing scientific texts	He knows and understands the advanced conceptual apparatus of physical geography and geoinformation, selected Polish and foreign language literature on physical geography, as well as the principles of preparing and editing scientific texts, program content: 1-3.	[SW3] text preparation/written work
[GFGMU2_U01] is able to find, select and critically evaluate sources of information about the research problem to be implemented	Able to find, select and critically evaluate sources of information on the research problem assigned for implementation, program content: 1-3.	[SU3] text preparation/written work
[GFGMU2_U03] is able to use academic literature in the fields of physical geography and geoinformation in Polish and English, selecting it appropriately for the research objective	Can effectively use skillfully selected for the purpose of application of scientific literature in the field of the research problem assigned for implementation, program content: 1-3.	[SU3] text preparation/written work
[GFGMU2_W05] knows and understands to a deepened extent principles of planning field and laboratory research using techniques and research tools used in geomorphology, hydrology and climatology, as well as principles of operating equipment and devices used to obtain and process digital geographic information in accordance with health and safety principles	Knows and understands the principles of planning field and laboratory research using techniques and research tools used in geomorphology, hydrology and climatology, as well as the principles of operating equipment and devices for the acquisition and processing of digital geographic information, curriculum content: 1-3.	[SW3] text preparation/written work
[GFGMU2_U08] is able to plan and carry out specialized field measurements, either independently or while leading a group, observe processes and phenomena occurring in the natural environment, and interpret the results	Can plan independently or cooperating in a group and perform specialized laboratory measurements and make observations of processes and phenomena occurring in the natural environment and interpret their results, curriculum content: 1-3.	[SU3] text preparation/written work
[GFGMU2_K03] is prepared to fulfil professional responsibilities in both independent and team-based work by advancing the field of geography, upholding the profession’s ethos, adhering to and developing the principles of professional ethics, and ensuring compliance with these principles	He is ready to actively expand professional competence and update knowledge in earth and environmental sciences and geoinformation enriching them with an interdisciplinary dimension, observing and developing the principles of professional ethics, including the observance of copyrights in his own and others' activities, curricular content: 1-3.	[SK3] text preparation/written work [SK8] observation of student's independent or team work

Subject contents

The course covers:
- developing the research methodology to be used in the Msc Thesis,
- setting the operational objectives necessary for the completion of the Msc Thesis,
- searching for and selecting literature for the Msc Thesis,
- beginning the process of gathering research material,
- beginning the drafting of the introductory chapters of the Msc Thesis.

There can be individual aspects of the course dependent on the topic of the Msc Thesis.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Obtain a passing grade on the written paper prepared	51.0%	100.0%

Recommended reading

Basic literature	Plit F., 2007, How to write undergraduate and graduate papers in geography, UW, Warsaw (in Polish).Weiner J., 2001, Technique of writing and presenting natural science papers, PWN Scientific Publishers, Warsaw. (in Polish)
Supplementary literature	Supplementary literature adapted to the individual topic of the master's thesis performed.

	eResources addresses	
Example issues/ example questions/ tasks being completed	1. Review the literature in the field covering the topic of the master's thesis2. Collect the data necessary for your master's thesis3 Prepare an overview of the research methods you will use in your thesis
