University of Gdańsk

Subject card

Subject name and code	Introduction to Seabed Morphometry - lecture, PG_00204963		
Field of study	Oceanography		
Date of commencement of studies	October 2027	Academic year of realisation of subject	2027/2028
Education level	Master's studies	Subject group	Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study
Mode of study	full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	1	ECTS credits	2.0
Learning profile	academic	Assessment form	credit
Conducting unit	Faculty of Oceanography and Geography -> Rector		
Name and surname of lecturer (lecturers)	Subject supervisor	dr Karolina Trzcińska	
	Teachers		

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	0.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	2.0	18.0	50

Subject objectives

Recognition and understanding of methods of bathymetric data processing and quantitative and qualitative description of seabed morphometry.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	Understands processes in the sea and coastal zone	[SW4] test/exam - oral or written
[OCEANMU2-W02] knows and understands complex processes and phenomena occurring in the marine environment, with particular emphasis on the coastal zone, as well as complex relationships between living and non-living elements of the aquatic environment	Is proficient in oceanographic issues, including marine coastal zone processes	[SW4] test/exam - oral or written
[OCEANMU2-W03] has an in-depth understanding of research methods used in oceanography and related sciences, and interprets their mechanisms and interrelationships across different spatial and temporal scales	At an advanced level,she/he is able to use research methods used in oceanography.	[SW4] test/exam - oral or written

Subject contents

Morphometry as a tool and a scientific sub-discipline.Methodology of bathymetric measurements.Bathymetric data interpolation methods.Uneven bottom surface - Numerical Terrain Model.Morphometric description and morphometric parameters.Seabed relief forms.Elements of statistical analysis of morphometric relief forms.Software used in morphometry.Classification of morphological features of bottom surface and bottom sediments.Morphometric reconstruction of bottom-forming processes - a case study.
